Technology On The Frontier Mining In Old Ontario:

Technology on the Frontier Dianne Newell, 2011-11-01 This book tells about a frontier region in economic transition Its focus is the successful adoption of new technology to the particular economic and engineering circumstances associated with the newness or frontier nature of Ontario mining to 1890 *Making Ontario* David Wood, 2000-04-06 The colony that became Ontario arose almost spontaneously out of the confusion and uncertainty following the American Revolution as a quickly chosen refuge for some 10 000 Loyalists who had to leave their former homes After the War of 1812 settlers began to spread throughout the inter lake peninsula that was to become southern Ontario and by the middle of the nineteenth century expansion had led to a diversifying agriculture and an increasingly open farming landscape that replaced a mature forest ecosystem The scale of the change from forest to cropland profoundly affected what had been for many decades a rich environment for life forms from large herbivores down to microscopic creatures In *Making Ontario* David Wood shows that the most effective agent of change in the first century of Ontario s development was not the locomotive but settlers attempts to change the forest into agricultural land Wood traces the various threads that went into creating a successful farming colony while documenting the sacrifice of the forest ecosystem to the demands of progress progress that prepared the ground for the railway *Making Ontario* provides a detailed focus on environmental modification at a time of great changes It is liberally illustrated with analytical maps based on archival research **The Texture of Industry** Robert B.

Gordon, Patrick M. Malone, 1997-02-06 While historians have given ample attention to stories of entrepreneurship invention and labor conflict they have told us little about actual work places and how people worked Workers seldom wrote about their daily employment However they did leave behind their tools products shops and factories as well as the surrounding industrial landscapes and communities In this book Gordon and Malone look at the industrialization of North America from the perspective of the industrial archaeologist Using material evidence from such varied sites as Indian steatite quarries automobile plants and coal mines they examine manufacturing technology transportation systems and the effects of industrialization on the land Their research greatly expands our understanding of industry and focuses attention on the contributions of anonymous artisans whose skills shaped our industrial heritage **The Weight of Gold** Mica

Jorgenson, 2023-06-06 Mining in North America has long been criticized for its impact on the natural environment Mica Jorgenson s *The Weight of Gold* explores the history of Ontario Canada s rise to prominence in the gold mining industry while detailing a series of environmental crises related to extraction activities In Ontario in 1909 the discovery of exceptionally rich hard rock gold deposits in the Abitibi region in the north precipitated industrial development modeled on precedents in Australia South Africa and the United States By the late 1920s Ontario s mines had reached their maturity and in 1928 Minister of Mines Charles McRae called Canada the mineral treasure house to the world Mining companies increasingly depended upon their ability to redistribute the burdens of mining onto surrounding communities a strategy they continue to

use today both at home and abroad Jorgenson connects Canadian gold mining to its international context revealing that Ontario's gold mines informed extractive knowledge which would go on to shape Canada's mining industry over the next century *Canadian History: Confederation to the present* Martin Brook Taylor, Doug Owram, 1994-01-01 In these two volumes which replace the Reader's Guide to Canadian History experts provide a select and critical guide to historical writing about pre and post Confederation Canada with an emphasis on the most recent scholarship Cover International Bibliography of Business History Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians *Working Lives* Craig Heron, 2018-10-09 Craig Heron is one of Canada's leading labour historians Drawing together fifteen of Heron's new and previously published essays on working class life in Canada Working Lives covers a wide range of issues including politics culture gender wage earning and union organization A timely contribution to the evolving field of labour studies in Canada this cohesive collection of essays analyzes the daily experiences of people working across Canada over more than two hundred years Honest in its depictions of the historical complexities of daily life Working Lives raises issues in the writing of Canadian working class history especially working class realism and how it is eventually inscribed into Canada's public history Thoughtfully reflecting on the ways in which workers interact with the past Heron discusses the important role historians and museums play in remembering the adversity and milestones experienced by Canada's working class **At the End of the Shift** Matt Bray, Ashley Thomson, 1996-01-07 Mining has played a formative role in the history of Northern Ontario It has been one of the key generators of wealth in the area since the mid 19th century and is also responsible for much of the urban development of Ontario's northland The twelve papers published here came out of the second annual conference of Northern Ontario research and development held in 1990 The papers are grouped into four sections the early years the era of government intervention the present and finally the future and what can be done to maintain the communities The Evolution of Resource Property Rights Anthony Scott, 2008-03-27 This book traces the development of the standard property rights over five kinds of natural resource inland rivers ocean fisheries petroleum resources gold and base metals and forest resources from classical times through to the 19th century Completely private resources and those in the public or Crown lands are given equal attention and a simple supply and demand model is used to

explain how property rights are altered over time Scott also provides the reader with a unique set of characteristics for defining rights and numerous case studies and examples of their evolution highlighting the increasing recourse to common law courts and government legislation and the problems caused by competing demands on the same limited resources This book provides a unique insight into the historical development of property rights and makes a special plea for the multiple purpose and multi owner management of resource rights It will provide a valuable resource for those interested in resource management economic history property rights and development

A Global History of Gold Rushes Benjamin Mountford, Stephen Tuffnell, 2018-10-16 Nothing set the world in motion like gold Between the discovery of California placer gold in 1848 and the rush to Alaska fifty years later the search for the precious yellow metal accelerated worldwide circulations of people goods capital and technologies A Global History of Gold Rushes brings together historians of the United States Africa Australasia and the Pacific World to tell the rich story of these nineteenth century gold rushes from a global perspective Gold was central to the growth of capitalism it whetted the appetites of empire builders mobilized the integration of global markets and economies profoundly affected the environment and transformed large scale migration patterns Together these essays tell the story of fifty years that changed the world
