thinging to sense and make sense of the world In using this observation to approach Indonesian society Mr zek captures that society off balance allowing us to see it in unfamiliar positions The result is a singular work with surprises for readers throughout the social sciences not least those interested in Southeast Asia or colonialism more broadly **Pierre Teilhard De Chardin on People and Planet** Celia Deane-Drummond,2017-07-05 Humanity s relationship to nature is central to the work of Pierre Teilhard de Chardin an influential priest and scientist of the twentieth century Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity s understanding of its place in the world Pierre Teilhard de Chardin on People and Planet argues that Teilhard s cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality The book offers a critical revision of Teilhard s thought in the light of current debates in evolutionary science eco theology and environmental ethics The essays present fresh interpretations of Teilhard s work and point to the significance of his thought in the contemporary study of science and religion **Spirit, Soul, Body** Cyprian Consiglio,2015 A perennial problem for spiritual traditions of all sorts is dualism either a positing of a false distance between the Divine and the created or a rejection of creation and the human body Many contemporary spiritual seekers have sensed this problem and sought to remedy it through myriad solutions drawn from various spiritual traditions and secular wisdom both Eastern and Western Cyprian Consiglio OSB Cam explores Christianity s contribution to the discussion He offers a revisioning and rearticulation of this teaching based on the prophetic seminal work of Bede Griffiths toward a practical and integral spirituality that reverences all aspects of our being human spirit soul and body **Evolutionary Studies** W.Milo Keynes,G.A. Harrison,1989-06-18 This collection of papers is in honour of Julian Huxley President from 1959 until 1962 of the Eugenics Society which exists to support research into genetic and social factors of human reproduction with a view to improving problems associated with heredity human qualities and population **The Hierarchical Genome and Differentiation Waves** Richard Gordon,1999 Over the past few decades numerous scientists have called for a unification of the fields of embryo development genetics and evolution Each field has glaring holes in its ability to explain the fundamental phenomena of life In this book the author shows how the phenomenon of cell differentiation considered in its temporal and spatial aspects during embryogenesis provides a starting point for a unified theory of multicellular organisms plants fungi and animals including their evolution and genetics This unification is based on the recent discovery of differentiation waves by the author and his colleagues described in the appendices and illustrated by a flip movie prepared by a medical artist To help the reader through the many fields covered a glossary is included This book will be of great value to the researcher and practicing doctors scientists alike The research students will receive an in depth tutorial on the topics covered The seasoned researcher will appreciate the applications and the gold mine of other possibilities for novel research topics
