Telecommunications and Energy in Systemic Transformation Paul J.J. Welfens, George Yarrow, 2012-12-06 Paul J J Welfens and George Yarrow A Telecommunications in Western Europe Liberalization Technological Dynamics and Regulatory Developments 9 Paul J J Welfens and Cornelius Graack 1 Introduction 9 2 Liberalization and Market Expansion in Telecommunications 12 2 1 Global Forces in Telecoms Liberalization 19 2 2 Privatization and Deregulation in Western Europe 22 2 3 Politico economic Deregulation Pressures 26 3 Technological Dynamics 30 3 1 Digitization 31 3 2 Integrated Services Digital Network 33 3 3 Fibre Optics Fibre to the Home and Optical Networks 35 3 4 Mobile Communications 38 4 Regulatory Developments 40 4 1 Regulatory Developments on the EC Level 41 4 2 National Regulatory Frameworks Developments and Experiences 46 4 2 1 Telecommunications Equipment 47 4 2 2 Value added Services 49 4 2 3 Infrastructure 52 5 Prospects and Consequences for Central and Eastern Europe 72 Appendix 78 B Telecommunications in Systemic Transformation Theoretical Issues and Policy Options 85 Paul J J Welfens 1 Introduction 85 2 Points of Departure in Eastern Europe 90 2 1 Structure of the Telecoms Industry in an East West Perspective 94 2 2 Telecoms Industry as a Strategic Industry for Systemic Transition 97 VI Telecommunications and Energy in Systemic Transformation 3 Theoretical Aspects of the Telecoms Industry 99 3 1 Some Problems of Uniform Subscriber Pricing 99 3 2 Competition Natural Monopoly and Economies of Scope 102 3 3 External Effects of Telecoms Network Expansion 109 3 Towards Competition in Network Industries Paul J.J. Welfens, George Yarrow, Ruslan Grinberg, Cornelius Graack, 2012-12-06 Competition in network industries faces particular problems which are analyzed from both a theoretical and policy perspective Issues of vertical integration deregulation and privatization are covered While competition and privatization are rapidly unfolding in telecommunications in Western and Eastern Europe energy and railway transportation represent sectors of more gradual liberalization The different market characteristics of telecommunications energy and transportation raise consistency problems in the fields of deregulation investment strategies and internationalization While transformation policies create opportunities for liberalization in Eastern Europe and Russia the latter shows critical problems in ending monopoly and state ownership Network industries could be subject to competition and promise major investment opportunities plus consumer benefits

Real and Financial Economic Dynamics in Russia and Eastern Europe Timothy Lane, 2003-06-18 Russia and many other transition countries are now facing the challenges of opening up restructuring and modernizing their economies which requires addressing numerous institutional weaknesses and supply side distortions From a regional perspective drawing on the experience of other reforming countries the papers examine these issues Aspects addressed include the implications of trade and capital flows the process of labor market reform financial market development productivity growth and innovation dynamics The dynamics of the reform process are also studied in the context of new political economy models European

Monetary Union and Exchange Rate Dynamics Paul J. J. Welfens, 2001 The creation of the European Central Bank and the Euro have brought new challenges to EU integration and economic policy This book looks into issues of monetary and factor market policies The analysis also presents new theoretical and empirical research on the transitory decline of the Euro Issues of exchange rate policy and international economic relations also are addressed **Energy Policies in the European**

Union P.J.J. Welfens, B. Meyer, W. Pfaffenberger, P. Jasinski, A. Jungmittag, 2013-03-14 Global warming is a serious threat to the stability of world climate and to economic prosperity in some regions The book offers a theoretical analysis which focuses on double dividend issues Moreover the ecological tax reform in Germany and the options of modern energy policy are described and evaluated The volume presents innovative model simulations and analyzes in the context of the model the benefits of a modified tax reform based on a Schumpeterian approach Finally implications for the European Union and other countries are discussed Globalization, Economic Growth and Innovation Dynamics Paul J.J. Welfens, John T. Addison, David

B. Audretsch, Thomas Gries, Hariolf Grupp, 2013-03-14 In the new global economy more countries have opened up to international competition and rapid capital flows However in the triad the process of globalization is rather asymmetric With a rising role of multinational companies there are favorable prospects for higher global growth and economic catching up respectively Theoretical analysis suggests key ingredients of sustained growth but there is also a new concept of a long term equilibrium income gap in which convergence is rather unlikely The analysis also picks up European and US labor market issues in the context of economic globalization and raises the question of which EU policies in the field of labor market reform and of innovation policies are adequate Economic Opening Up and Growth in Russia Evgeny Gavrilentov, Paul J.J.

Welfens, Ralf Wiegert, 2013-03-19 After a decade of sharp economic decline Russia switched to an impressive period of economic growth Yet the economic record is still mixed and many key problems remain unresolved both in the economic sphere and the political system The focus is on economic dynamics in Russia reasons for its hesitant opening up process as well as the special role of the natural resources sector which is expected to continue to grow This analysis highlights the existing deficiencies of the Russian economic system and raises doubts about the sustainability of growth Twin focus is on required reforms and endogenous forces that impair liberalizing trade and investment in an orderly way Russian discussions on WTO and other international topics are reflected **Integration in Asia and Europe** Paul J.J. Welfens, 2006 Broadening

and deepening of economic and political integration are hallmarks of the EU and ASEAN Analysing the economic and institutional changes in both Europe and Asia this book emphasizes on banking financial market dynamics ICT and macroeconomic policies The legal aspects are combined with historical and economic perspectives EU Eastern Enlargement and the Russian Transformation Crisis Paul J.J. Welfens, 2012-12-06 Europe's economic and political landscape is changing dramatically The demise of the socialist CMEA and the USSR has allowed eastern European economies to open up and caused Russia the CIS to engage in a series of difficult reforms which have been supported by the G 7 and the

International Monetary Fund plus the World Bank on the one hand and on the other hand by the EU and the EBRD While some of the early Visegrad countries apparently were rather successful in their transition attempt systemic transition approaches in other countries Romania and Bulgaria and above all in Russia largely were a failure Economic hardship social unrest political radicalization and the international spreading of criminal activities can be identified as problems from the failure of Russia's first transition attempt This book deals from an international perspective with the postsocialist countries in Europe i.e. there is a focus on eastern enlargement and on Russia on the one hand on the other hand the topic is which international influences and effects will emerge from EU enlargement and the Russian transition While chapter A exclusively deals with major problems of eastern enlargement and the policy options for dealing with this difficult problem chapter B is devoted to the Russian transformation crisis There the analysis has a focus on Russia in its own right but also on the potential negative spillovers of a Russian transformation disaster which could occur in the late 1990s

Labor Markets and Social Security John T. Addison, Paul J.J. Welfens, 2013-03-09 John T Addison and Paul J J Welfens Because inflation seems moribund in OECD countries stubborn unemployment became the top policy priority of the 1990s Unemployment has increased in many countries reaching critical levels for unskilled and young workers in most continental EU countries Europe's employment performance has continued to lag that in North America The U S in particular achieved a remarkable combination of low inflation and full employment in the late 1990s at a time when the EU suffered from record unemployment rates even if inflation was remarkably low Since the 1980s the consensus view among economists is that structural unemployment plays a much more important role than cyclical unemployment in Europe but that labour costs wage costs plus nonwage costs are also part of Europe's labour market problem Most EU countries rely on a pay as you go public pension system Contribution rates gradually increased in the 1980s and 1990s when the share of young workers in overall employment was declining and life expectancy increasing Rising nonwage costs from the pension system are but one important feature of labour markets in Europe Given the remarkable dynamics of labour markets new entry into the labour force labour turnover and changes in employment characteristics one has to also search for other factors behind sustained unemployment High unemployment is critical for EU countries where one can point to relatively few positive developments after 1975 The U K
