Over 600 diagrams and figures connect analytic work to geometry and aid visualization. Many fully worked examples throughout clarify main ideas and techniques. Over 1400 exercises meet student needs from practice with the basics to applications to mid-level exercises to more challenging conceptual questions. Optional CAS exercises are provided. Chapter-ending exercises help students synthesize material from multiple sections, and true/false exercises appear at the end of each chapter. Carefully chosen advanced topics help instructors take the discussion beyond the level of other vector calculus texts. New and updated features of this title: New derivations of the orthogonal projection formula and the Cauchy-Schwarz inequality appear in Chapter 1. Vectors: A description of the geometric interpretation of second-order partial derivatives has been added to Chapter 2. Vector Calculus Susan Jane Colley, 2006. For sophomore-level courses in Multivariable Calculus. This text uses the language and notation of vectors and matrices to clarify issues in multivariable calculus. Accessible to anyone with a good background in single-variable calculus, it presents more linear algebra than usually found in a multivariable calculus book. Colley balances this with very clear and expansive exposition, many figures, and numerous wide-ranging exercises. Instructors will appreciate Colley's writing style, mathematical precision, level of rigor, and full selection of topics treated.

Vector Calculus Alice Gorguis, 2015-07-07. Even though additional materials were added to this edition, the learning system remains untouched to provide students with an easy method to learn the concept and apply it to real problems. My intention in writing this book was to include materials that are enough to be covered in one single semester without eliminating anything. The chapters are the following: Chapter 1: All about Vectors; Chapter 2: Functions and Variables with Derivatives; Chapter 3: Integrals; Chapter 4: Line and Surface Integrals and Theorems.
