descriptions of what it takes to be an effective teacher of mathematics Rethinking the Mathematics Curriculum Celia Hoyles, Candia Morgan, Geoffrey Woodhouse, 2002-01-04 At a time when political interest in mathematics education is at its highest this book demonstrates that the issues are far from straightforward A wide range of international contributors address such questions as What is mathematics and what is it for What skills does mathematics education need to provide as technology advances What are the implications for teacher education What can we learn from past attempts to change the mathematics curriculum Rethinking the Mathematics Curriculum offers stimulating discussions showing much is to be learnt from the differences in culture national expectations and political restraints revealed in the book This accessible book will be of particular interest to policy makers curriculum developers educators researchers and employers as well as the general Task Design In Mathematics Education Anne Watson, Minoru Ohtani, 2015-10-26 THIS BOOK IS AVAILABLE reader AS OPEN ACCESS BOOK ON SPRINGERLINK This open access book is the product of ICMI Study 22 Task Design in Mathematics Education The study offers a state of the art summary of relevant research and goes beyond that to develop new insights and new areas of knowledge and study about task design The authors represent a wide range of countries and cultures and are leading researchers teachers and designers In particular the authors develop explicit understandings of the opportunities and difficulties involved in designing and implementing tasks and of the interfaces between the teaching researching and designing roles recognising that these might be undertaken by the same person or by completely separate teams Tasks generate the activity through which learners meet mathematical concepts ideas strategies and learn to use and develop mathematical thinking and modes of enquiry Teaching includes the selection modification design sequencing installation observation and evaluation of tasks The book illustrates how task design is core to effective teaching whether the task is a complex extended investigation or a small part of a lesson whether it is part of a curriculum system such as a textbook or promotes free standing activity whether the task comes from published source or is devised by the teacher or the student Handbook on the History of Mathematics Education Alexander Karp, Gert Schubring, 2014-01-25 This is the first comprehensive International Handbook on the History of Mathematics Education covering a wide spectrum of epochs and civilizations countries and cultures Until now much of the research into the rich and varied history of mathematics education has remained inaccessible to the vast majority of scholars not least because it has been written in the language and for readers of an individual country And yet a historical overview however brief has become an indispensable element of nearly every dissertation and scholarly article This handbook provides for the first time a comprehensive and systematic aid for researchers around the world in finding the information they need about historical developments in mathematics education not only in their own countries but globally as well Although written primarily for mathematics educators this handbook will also be of interest to researchers of the history of education in general as well as specialists in cultural and even social history **Teaching and Learning Algebra** Doug French, 2005-08-15 Algebra is widely recognised to be a

difficult aspect of the Mathematics curriculum one that not all pupils see the point of Yet an understanding of algebra provides the key to the great power and potential interest of Mathematics in general Up to now detailed advice and guidance on the teaching and learning of algebra has been difficult to find Here however Doug French provides a comprehensive authoritative and above all constructive guide to the subject For the Learning of Mathematics ,1998 Mathematical Projects Brian Bolt, David Hobbs, 1989-06-29 This book for teachers suggests projects which cater for a wide range of concepts and skills and links with other curriculum subjects Mathematics for Junior High School University of SMP 11-16 Book G7 School Mathematics Project, 1987-09-03 SMP 11 16 is a Maryland Mathematics Project, 1959 mathematics resource for secondary schools which emphasises the relationship between mathematics and the world around us The course material falls into two parts Part 1 covering the first two years consists mainly but not exclusively of booklets arranged into strands which enable pupils to work at their own pace Part 2 covering Years 9 10 and 11 consists principally of five series of books designed to suit pupils of different attainment Y yellow R red B blue G green and A amber Mathematics: Engaging Teachers And Engaged Students David Graham Wells, 2015-10-15 Motivating Mathematics demonstrates that pupils can be motivated by being given the Big Picture including a clearer picture of the nature of maths and by linking topics to the sciences rather than teaching each topic in isolation The author emphasises the many virtues of problem solving strongly emphasised in secondary education specifications especially the role of perception and the ability of pupils to create their own proofs and to appreciate cool ideas and arguments David Wells draws on his extensive experience of teaching primary and secondary pupils and his understanding not just of how students think about mathematics but of how they feel about a subject which so often seems merely a collection of facts and rules to be mastered This book will be of immediate practical use to teachers and students at all levels Anyone involved in mathematics education will benefit from reading this inspiring book whether classroom teacher trainer teacher in training or professional development or even parent The book will also be of interest to policy makers and others with an investment in the future of mathematics education
