Towns Patricia Dennison,2018-01-23 A new analysis of mind body unity based on the philosophy of Spinoza **Essays on David Hume, Medical Men and the Scottish Enlightenment** Roger L. Emerson,2016-05-13 The Scottish Enlightenment was a period of intellectual and scientific progress in a country previously considered to be marginal to the European intellectual scene Yet the enlightenment was not about politeness or civic humanism but something more basic the making of an improved society which could compete in every way in a rapidly changing world David Hume writing in 1752 commented that industry knowledge and humanity are linked together by an indissoluble chain Collectively this volume of essays embraces many of the topics which Hume included under industry knowledge and humanity from the European Enlightenment and the Scots relation to it to Scottish social history and its relation to religion science and medicine Overarching themes of what it meant to be enlightened in the eighteenth century are considered alongside more specific studies of notable figures of the period such as Archibald Campbell 3rd Duke of Argyll and David Hume and the training and number of Scottish medical students Together the volume provides an opportunity to step back and reconsider the Scottish Enlightenment in its broader context and to consider what new directions this field of study might take Dr. John Moore, 1729-1802 Henry L. Life in the Victorian Hospital Michelle Higgs,2017-05-08 Throughout the Victorian period life threatening diseases were no respecter of class affecting rich and poor alike However the medical treatment for such diseases differed significantly depending on the class of patient The wealthy received private medical treatment at home or later in a practitioner s consulting room The middle classes might also pay for their treatment but in addition they could attend one of an increasing number of specialist hospitals The working classes could get free treatment from charitable voluntary hospitals or dispensaries For the abject poor who were receiving poor relief their only option was

to seek treatment at the workhouse infirmary The experience of a patient going into hospital at this time was vastly different from that at the end This was not just in terms of being attended by trained nurses or in the medical and surgical advances which had taken place Different methods for treating diseases and the use of antiseptic and aseptic techniques to combat killer hospital infections led to a much higher standard of care than was previously available
