Culturally Adapting Psychotherapy for Asian Heritage Populations
Wei-Chin Hwang, 2016-03-31 Current census reports indicate that over half of the United States will be of ethnic minority background by 2050. Yet few published studies have examined or demonstrated the efficacy of currently established psychological treatments for ethnic minorities. *Culturally Adapting Psychotherapy for Asian Heritage Populations: An Evidence Based Approach* identifies the need for culturally adapted psychotherapy and helps support the cultural competency movement by helping providers develop specific skillsets rather than merely focusing on cultural self awareness and knowledge of other groups. The book provides a top down and bottom up community participatory framework for developing culturally adapted interventions that can be readily applied to many other groups. Areas targeted for adaptation are broken down into domains, principles, and the justifying rationales. This is one of the first books that provides concrete practical and specific advice for researchers and practitioners alike.
