Hamada,Mohamed Abdel Hady Gepreel,Dr. Nagih Shaalan,Ahmed Hassanin,Koichi Nakamura,2018-10-31 International Conference on Materials Science and Engineering Recent Advances and Challenges Selected peer reviewed papers from the International Conference on Materials Science and Engineering Recent Advances and Challenges ICMSE RAC 2018 March 11-13 2018 Egypt Human Behavior Analysis: Sensing and Understanding Zhiwen Yu,Zhu Wang,2020-02-29 Over the last decade there has been a growing interest in human behavior analysis motivated by societal needs such as security natural interfaces affective computing and assisted living However the accurate and non invasive detection and recognition of human behavior remain major challenges and the focus of many research efforts Traditionally in order to identify human behavior it is first necessary to continuously collect the readings of physical sensing devices e.g. camera GPS and RFID which can be worn on human bodies attached to objects or deployed in the environment Afterwards using recognition algorithms or classification models the behavior types can be identified so as to facilitate advanced applications Although such traditional approaches deliver satisfactory performance and are still widely used most of them are intrusive and require specific sensing devices raising issues such as privacy and deployment costs In this book we will present our latest findings on non invasive sensing and understanding of human behavior Specifically this book differs from existing literature in the following senses Firstly we focus on approaches that are based on non invasive sensing technologies including both sensor based and device free variants Secondly while most existing studies examine individual behaviors we will systematically elaborate on how to understand human behaviors of various granularities including not only individual level but also group level and community level behaviors Lastly we will discuss the most important scientific problems and open issues involved in human behavior analysis Security of Internet of Things Nodes Chinmay Chakraborty,Sree Ranjani Rajendran,Muhammad Habibur Rehman,2021-08-30 The book Security of Internet of Things Nodes Challenges Attacks and Countermeasures covers a wide range of research topics on the security of the Internet of Things nodes along with the latest research development in the domain of Internet of Things It also covers various algorithms techniques and schemes in the field of computer science with state of the art tools and technologies This book mainly focuses on the security challenges of the Internet of Things devices and the countermeasures to overcome security vulnerabilities Also it highlights trust management issues on the Internet of Things nodes to build secured Internet of Things systems The book also covers the necessity of a system model for the Internet of Things devices to ensure security at the hardware level **Entscheidungen beim Übergang in die**
