Gardner,2008-09-15 The vast

terrain between Panama and Tierra del Fuego contains some of the world's richest mammalian fauna but until now it has lacked a comprehensive systematic reference to the identification distribution and taxonomy of its mammals. The first such book of its kind and the inaugural volume in a three-part series *Mammals of South America* both summarizes existing information and encourages further research of the mammals indigenous to the region. Containing identification keys and brief descriptions of each order, family, and genus, the first volume of *Mammals of South America* covers marsupials, shrews, armadillos, sloths, anteaters, and bats. Species accounts include taxonomic descriptions, synonymies, keys to identification, distributions with maps, and a gazetteer of marginal localities. Lists of recognized subspecies, brief summaries of natural history information, and discussions of issues related to taxonomic interpretations. Highly anticipated and much needed, this book will be a landmark contribution to mammalogy, zoology, tropical biology, and conservation biology. *Field Guide to the Palms of the Americas* Andrew Henderson, Gloria Galeano, Rodrigo Bernal, 2019-04-23 This user-friendly and authoritative book will serve scientists, growers, and sightseers as a guide to the 67 genera and 550 species of naturally occurring palms found in the Americas. Its purpose is to give an introduction to the diversity of palms and allow almost anyone to identify a palm from this part of the world. Andrew Henderson is Assistant Scientist at the New York Botanical Garden. Gloria Galeano and Rodrigo Bernal are Assistant Professors at the Instituto de Ciencias Naturales, Universidad Nacional de Colombia, Bogotá. Bishop, Peter Clegg, 2016-11-18 This book compares and contrasts the contemporary development experience of neighbouring geographically similar countries with an analogous history of exploitation but by three different European colonisers. Studying the so-called Three Guianas (Guyana, Suriname, and French Guiana) offers a unique opportunity to look for similarities and differences in their contemporary patterns of development, particularly as they grapple with new and complex shifts in the regional, hemispheric, and global context. Shaped decisively by their respective historical experiences, Guyana, in tandem with the *laissez faire* approach of Britain toward its Caribbean colonies, was decolonised relatively early in 1966 and has maintained a significant degree of distance from London. The hold of The Hague over Suriname, however, endured well after independence in 1975. French Guiana, by contrast, was decolonised much sooner than both of its neighbours in 1946 but this was through full integration, thus cementing its place within the political economy and administrative structures of France itself. Traditionally isolated from the Caribbean, the wider Latin American continent, and from each other, today a range of similar issues such as migration, resource extraction,

infrastructure development and energy security are coming to bear on their societies and provoking deep and complex changes
