Parking Structures Anthony P. Chrest, 2001-02-28 *Parking Structures* provides a single source reference for parking structure designers, builders, and owners. This third edition is still the only such book. It addresses how to select the best functional and structural designs for a given situation, ensure long-term durability, design for easy maintenance, decide on the number and placement of entrances and exits, design an easily understood wayfinding system, design for ADA compliance, plan for internal auto and pedestrian traffic circulation, select the most effective and energy-efficient lighting system, avoid the most common design and construction pitfalls, provide for adequate patron safety and security, carry out needed repairs, and extend the parking structure life. *Parking Structures* addresses all the major issues related to parking garages. It is an essential reference for parking structure owners, structural engineers, architects, contractors, and other professionals. New in the third edition: This third edition of *Parking Structures* includes new material on metric dimensions and recommendations for functional design, globally new research on flow capacity and queuing at parking entry/exits, an entirely new chapter on planning for a new parking structure including cost issues and alternatives to structure construction, pedestrian considerations, safety in parking facilities, plazas above parking structures, an expanded chapter on seismic design, seismic retrofit, life cycle cost analysis, and upgrades to existing structures.

Master Plan, National Institutes of Health Main Campus in Bethesda, Montgomery County, 1995 *InTerior Design - Convolute* Håkan Gulliksson, The home is under siege both because it is an enormous potential market and because of changing human behaviours. It is also interesting as a platform for new technology and for analysis of everyday life as in this essay. We will describe the home as a context where the interactors are humans, inhabitants, things, artefacts, in the home and information. The interactions at home are activities and routines. This essay presents and structures quotes and thoughts on the organization and decoration of the home, another huge topic. To limit the scope somewhat, we will look for theory to discuss only related to homes of the western middle class. The essay is yet another piece in a puzzle to understand information technology in the future.

Place, Space, and Mediated Communication Carolyn Marvin, Hong Sun-ha, 2017-04-21 *Place Space and Mediated Communication* explores how new communications technologies are able to disrupt our spatial understanding and in so doing reorganize the boundaries of human experience, a phenomenon that can rightly be described as context collapse. Individual essays investigate context collapse in a variety of geographical and temporal settings, including the US drone war in Pakistan, social media and sexuality in Paris, privacy and privilege in Brazil, and videogames and resistance in Iran. This cross-disciplinary collection of essays demonstrates how communication and space are co-constituted and models exciting new paths of inquiry for researchers. *Place Space and Mediated Communication* is suitable for students and scholars of media and communication studies, cultural studies, urban studies, and sociology.
