Politics of Forests Jakob Donner-Amnell, 2017-03-02 Bringing together case studies from Canada the Nordic countries and Russia this book is the first to provide a comparative examination of the current transformations in the forest industry regimes and the challenges they make for the communities dependent on this industry Questioning how globalization has influenced forest regimes the book focuses on individual forest companies and argues that they are the main motors of the industry s internationalization often without taking due consideration of the complex interrelations between society the environment and forest trade During the current phase of globalization the sphere of material production within the forest industry has increasingly been modified by more speculative signals from the market Both the growing role of investor interests as well as the broader societal demands for greening the production chain have forced managers to be more sensitive to the performance profile and image of their companies In conclusion the book highlights instances of processes working towards homogenization and diversity and suggests that while Anglo American management practice is increasingly important across the northern forest regions it is also meeting with resistance due to historical and political conditions

Environmental History in the Making Estelita Vaz,Cristina Joanaz de Melo,Lígia M. Costa Pinto,2016-10-13 This book is the product of the 2nd World Conference on Environmental History held in Guimarães Portugal in 2014 It gathers works by authors from the five continents addressing concerns raised by past events so as to provide information to help manage the present and the future It reveals how our cultural background and examples of past territorial intervention can help to combat political and cultural limitations through the common language of environmental benefits without disguising harmful past human interventions Considering that political ideologies such as socialism and

capitalism as well as religion fail to offer global paradigms for common ground an environmentally positive discourse instead of an ecological determinism might serve as an umbrella common language to overcome blocking factors real or invented and avoid repeating ecological loss Therefore agency environmental speech and historical research are urgently needed in order to sustain environmental paradigms and overcome political cultural and economic interests in the public arena This book intertwines reflections on our bonds with landscapes processes of natural and scientific transfer across the globe the changing of ecosystems the way in which scientific knowledge has historically both accelerated destruction and allowed a better distribution of vital resources or as it in today's world can offer alternatives that avoid harming those same vital natural resources water soil and air In addition it shows the relevance of cultural factors both in the taming of nature in favor of human comfort and in the role of the environment matters in the forging of cultural identities which cannot be detached from technical intervention in the world In short the book firstly studies the past approaching it as a data set of how the environment has shaped culture secondly seeks to understand the present and thirdly assesses future perspectives what to keep what to change and what to dream anew considering that conventional solutions have not sufficed to protect life on our planet
