English as a Creative Art Linden Peach,Angela Burton,2018-10-24 English as a Creative Art is different from previous works on either creative writing or contemporary literary criticism It is the first book to bring the two together demonstrating how concepts drawn from literary theory can be used to enable students to develop critical insights into their own writing Conversely it also aims to help students understand contemporary critical concepts and become more incisive thinkers through creative work

Talking About Literacy Jane Mace,2003-08-29 Talking about Literacy re examines dominant notions of what literacy is and challenges the problem solution reflex to the issue the problem is illiteracy the solution is more literacy Literacy has enormous emotional and political associations and the job of literacy educator often concerns changing attitudes and challenging prejudices whether in the form of publicity strategies counselling new students or in curriculum design In short adult literacy education means not only teaching courses like fresh start basic skills study skills communication skills language support and return to study but also designing strategies to encourage people to see that these courses may meet their own interests and educating them and others to rethink their own negative attitudes to illiteracy The book looks in detail in at five principles put forward by Jane Mace as central to the education of people who often can read but wish they could read better who technically can write but have a desire to do so with more expression and coherence These principles focus on five themes context inquiry authorship equality and community Since it is all too easy for literacy education involving adults who do not have formal qualifications to stop short of teaching techniques for correct writing these principles mean taking seriously a view that adult students are writers as well as readers that they have an entitlement to be read as well as to read others

Teaching Literacy Fred Sedgwick,2002-02-01 The teaching of literacy is a high priority for teachers and for governments yet some of the approaches commonly used are very limiting joyless and ultimately ineffective In contrast Fred Sedgwick shows how literacy can be combined with and promoted through a love of reading and children s ability to think and write creatively

Using a wide variety of rich resources the author shows how to put creative approaches into practice and illustrates through children's work just how rewarding those results can be *Active Reading* Ben Knights, Chris Thurgar-Dawson, 2008-06-01

The subject of this book is the crossover between critical study and creative writing. Active reading is a structured process of writing activities using imitation, variation and experimentation. Through practical composition techniques such as transformational writing, re-writing or translation, students can use writing activities to develop their critical imagination. This book bridges the gap between theories of learning and Literary studies in Higher Education. Setting the argument in an historical and theoretical context, it outlines the importance of writing as a medium of learning and argues for its usefulness in aiding English students' understanding of theoretical as well as literary and cultural texts. The authors provide a reflective account of teaching and assessment methods using writing activities and critical thinking techniques and the forms of learning they promote. In the last section they explore the connections with other forms of writing practice in related disciplines and argue for the role of transformational writing in promoting independent learning. Appendices provide examples of the range of activities that can be used and an indicative list of literary examples.
