The Geography Of Thought How Asians And Westerners Think Differently And Why:

The Geography of Thought Richard E. Nisbett, 2003 When Richard Nisbett showed an animated underwater scene to his American students they zeroed in on a big fish swimming among smaller fish Japanese subjects on the other hand made observations about the background environment and the different sightings are a clue to profound underlying cognitive differences between Westerners and East Asians As Professor Nisbett shows in The Geography of Thought people actually think and even see the world differently because of differing ecologies social structures philosophies and educational systems that date back to ancient Greece and China and that have survived into the modern world As a result East Asian thought is holistic drawn to the perceptual field as a whole and to relations among objects and events within that field By comparison to Western modes of reasoning East Asian thought relies far less on categories or on formal logic it is fundamentally dialectic seeking a middle way between opposing thoughts By contrast Westerners focus on salient objects or people use attributes to assign them to categories and apply rules of formal logic to understand their behavior The Geography of Thought, 2008

The Geography of Thought Richard E. Nisbett, 2009 **Asian versus Western Management Thinking** Kimio Kase, Alesia Slocum, Yingying Zhang, 2011-08-09 Navigating paradigm changes is a critical element of business leadership analog to digital brand to retailer to consumer reason to emotion West to East Anything that illuminates these powershifts is valuable for the fast moving decision maker and in this respect Asian versus Western Management Thinking is a first rate inquiry into cultural business behaviors Insular frameworks of thinking and action matter less by the second I am an And And practitioner and my experience of bridging business between East and West and vice versa suggests we need to know the human distinctions that matter and the harmonies that will matter even more Between the covers of this book by Kimio Kase and colleagues business moves forward Kevin Roberts CEO Worldwide Saatchi Saatchi Lovemarks Company Having lived and worked my entire life in various countries around the world I agree with the authors premise that Asians and Westerners often approach business problems from different angles Rather than focusing on differences I welcome the strength that comes from diversity As my experience at Renault and Nissan has demonstrated the richest solutions come when ideas are challenged or questioned by people who have a different perspective This book illustrates the value of accepting diverging ideas as a fact of life that can be used to enhance the world in which we all live and work Carlos Ghosn Chairman and Chief Executive Officer Renault Nissan Alliance A most welcome addition to the unbalanced management literature about the analytical West and the synthetic East For too long the field has been dominated by comparisons of cultural value systems which paradoxically tell us precious little about how habits of mind influence management thinking and practice in different parts of the world over time At a time when the world's economic centre of gravity is visibly shifting to Asia this really is a most timely book Nigel Holden Visiting Research Fellow at the Centre for International Business at the University of Leeds UK *The Psychological and Cultural Foundations of East Asian Cognition* Julie Spencer-Rodgers, Kaiping Peng, 2018 The

Psychological and Cultural Foundations of East Asian Cognition is one of the most comprehensive volumes on East Asian cognition and thinking styles to date This book is also one of the first to bring together a large body of empirical research on two of the most influential theories in culture psychology na ve dialecticism and analytic holistic thinking **The Philosophy and Psychology of Character and Happiness** Nancy E. Snow,Franco V. Trivigno,2014-06-05 Since ancient times character virtue and happiness have been central to thinking about how to live well Yet until recently philosophers have thought about these topics in an empirical vacuum Taking up the general challenge of situationism that philosophers should pay attention to empirical psychology this interdisciplinary volume presents new essays from empirically informed perspectives by philosophers and psychologists on western as well as eastern conceptions of character virtue and happiness and related issues such as personality emotion and cognition attitudes and automaticity Researchers at the top of their fields offer exciting work that expands the horizons of empirically informed research on topics central to virtue ethics Zen Skin, Zen Marrow Steven Heine,2007-12-31 Since Zen Buddhism first captivated the attention of Western seekers the dominant discourse about this sect has been romantic idealistic and utopian The essence of Zen has been described as ineffable holistic and promoting social harmony In recent years however some scholars have begun to examine Zen through the lenses of historical and cultural criticism producing a sharp challenge to the traditional view These clashing viewpoints are now entrenched in two warring camps and their exponents talk past each other with virtually no constructive interaction In this book Steven Heine argues that a constructive compromise is possible He focuses on three principal areas of disagreement 1 the role of language and discourse in a tradition that claims to be outside words and letters yet has produced a voluminous body of texts 2 the function of rituals and objects of worship to gain world benefit in a tradition supposedly founded on unmediated experience attained in an iconoclastic and ascetic environment 3 the impact of a tradition that espouses peace and harmony on social issues such as class and gender discrimination and on nationalism and imperialism in Japan Avoiding the stagnant polarization that characterizes most encounters between Zen traditionalists and their critics he suggests ways in which these two perspectives can complement each other in a more balanced and nuanced alternative position **An Asian Perspective on Mediation** Joel Lee,Hwee Hwee Teh,2009 The prevailing mediation model and process is drawn primarily from the West For a long time there has been a call for conflict management approaches that are more appropriate for the Asian context This book answers the call by identifying cultural values and norms that affect how conflicts may be perceived through Asian lenses and how conflict management processes and practices should be structured *Personality, Human Development, and Culture* Ralf Schwarzer,Peter Frensch,2010-06-17 Volumes 1 and 2 of the Invited Lectures present the main contributions from the 29th International Congress of Psychology held in Berlin in 2008 Qualitative Research on Illness, Wellbeing and Self-Growth Kumar Ravi Priya,Ajit Kumar Dalal,2016-04-01 This book examines the theoretical methodological and practical dimensions of Qualitative Research in the study of illness wellbeing and self growth in the
