Stereoscopic Displays and Virtual Reality Systems VII John O. Merritt, 2000 Stereoscopic Displays and Virtual Reality Systems, 2002 Stereoscopic Displays and Virtual Reality Systems, 2005 3D Television (3DTV) Technology, Systems, and Deployment Daniel Minoli, 2010-11-17

Going beyond the technological building blocks of 3DTV 3D Television 3DTV Technology Systems and Deployment Rolling Out the Infrastructure for Next Generation Entertainment offers an early view of the deployment and rollout strategies of this emerging technology It covers cutting edge advances theories and techniques in end to end 3DTV systems to provide a system level view of the topic and what it takes to make this concept a commercial reality The book reflects the full range of questions being posed about post production 3D mastering delivery options and home screens It reviews fundamental visual concepts supporting stereographic perception of 3DTV and considers the various stages of a 3DTV system including capture representation coding transmission and display Presents new advances in 3DTV and display techniques Includes a 24 page color insert Identifies standardization activities critical to broad deployment Examines a different stage of an end to end 3DTV system in each chapter Considers the technical details related to 3DTV including compression and transmission technologies Discussing theory and application the text covers both stereoscopic and autostereoscopic techniques the latter eliminating the need for special glasses and allowing for viewer movement It also examines emerging holographic approaches which have the potential to provide the truest three dimensional images The book contains the results of a survey of a number of advocacy groups to provide a clear picture of the current state of the industry research trends future directions and underlying topics *Three-Dimensional Television* H.M. Ozaktas, Levent Onural, 2007-11-13

Advances in optical technology and computing power are bringing life like 3DTV closer with potential applications not only in entertainment but also in education scientific research industry medicine and many other areas 3DTV will require the integration of a diversity of key technologies from computing to graphics imaging to display and signal processing to communications The scope of this book reflects this diversity different chapters deal with different stages of an end to end 3DTV system such as capture representation coding transmission and display Both autostereoscopic techniques which eliminate the need for special glasses and allow viewer movement and holographic approaches which have the potential to provide the truest three dimensional images are covered Some chapters discuss current research trends in 3DTV technology while others address underlying topics This book is essential to those with an interest in 3DTV related research or applications and also of interest to those who while not directly working on 3DTV work in areas which developments in 3DTV may touch such as multimedia computer games virtual reality medical imaging and scientific simulation **Stereoscopic Displays and Virtual Reality Systems II**, 1995 **Digital Image Computing: Techniques and Applications** Changming Sun, Hugues Talbot, Sebastien Ourselin, Tony Adriaansen, 2003-12-01
