analysis and industry examples Seven chapters comprise a series of peer reviewed academic papers by Professor McCartney and Dr Stittle and published in leading international journals over the period 2004 2017 which analyse selected key segments of the privatised industry where appropriate updates are provided at the end of these chapters outlining developments since initial publication relevant to the analysis therein Two chapters are published here for the first time Chapter 7 reviews the performance of the freight sector while Chapter 1 bookends the volume by providing first an account of how rail privatisation was conceived and implemented in the 1980s 90s and then reviews the impact of the pandemic and the proposals of the Williams Shapps White Paper of 2021 which if enacted will effectively end the Major government s experiment Going far beyond the usual superficial analysis of the topic this volume will be of significant interest to researchers and advanced students of accounting economics business history transport studies as well as industry and specialised business interests in transport and privatisation
