Strategic Thinking:

Learning to Think Strategically Julia Sloan, 2016-11-03 Strategic thinking has become a core competency for business leaders globally. Overused and under defined, the term is often used interchangeably with other strategic management terms. This textbook delineates and defines strategic thinking as a conceptual cognitive capability focusing on the nonlinear, divergent and informal nature of strategic thinking. In this third edition of a popular text, the author provides an unconventional definition and model for strategic thinking based on critical theory. This research-based book introduces the concept as the foundation of business strategy that is distinct from strategic planning and strategic implementation. New features including executive summaries and key critical reflective questions along with new and updated figures make the book vital reading for MBA leadership development and executive education students. The practical nature of this book also makes it valuable for business and policy executives, managers and emerging leaders.

Choosing the Future Stuart Wells, 1998 Strategy requires an ability to conceive the future, see and create possibilities and focus to choose a direction. Successful strategy is a mental discipline consisting of broad ranging flexible and creative thinking. Choosing the Future will help you achieve this success by studying fundamentals such as effective group thinking, knowing when to delay a decision for more information, balancing contrasting modes of thought and transforming thought into action. Using a cycle to show the relationship among different strategic thinking tools, Choosing the Future gives you guidance to respond to these basic questions: What seems to be happening? What possibilities do we face? What are we going to do about it? Choosing the Future will help you advance your thinking skills. Rather than telling you what to do, it teaches you to use your business knowledge to discover your own ideas and strategic direction. Stuart Wells is Professor of Organization and Management at San Jose State University where he serves as Director of the Center for Global Competitiveness and as Director of the Small Business Institute. As founder of the Leading Edge Consulting Group and co-founder of Corporate Wisdom, he has worked on leadership development and strategy issues with such major corporations as Clorox, Dupont, PepsiCo and Procter and Gamble. He is the author of several books including *From Sage to Artisan*, *The Nine Roles of the Value Driven Leader*.

Strategic Thinking Simon Wootton, Terry Horne, 2010-07-03 Strategic Thinking: A Step by Step Approach to Strategy and Leadership now in its third edition takes you step by step through sound strategic thinking by setting out the questions to ask. In the process of answering these questions and thinking through the important issues that they raise, you will learn how to formulate strategies and write clear and concise strategic plans. With new online material to support each step and help strengthen your ability to predict future changes as well as a new section covering key aspects of leadership and neuroscience, this practical book will enable you to gain a deeper understanding of your market forecast where your organization is heading, think critically about proposals, write an effective strategic plan. Also including prompt sheets, objectives, action plans and useful summaries, this fully updated third edition is a must-have for all practicing managers and business students. Online
