This essay collection comes from an economist and so is not, strictly speaking, a philosophy book. But the author is an outstanding economist, and *Strategies of Commitment* is a very philosophical book. All pieces in it are remarkably lucid and truly engaging; each contains an original idea, and some read as series of insights; many offer examples of the kind that works effectively in a variety of settings – a conference talk, a journal article, a university class or even at the dinner table. Topics covered include old as well as relatively recent interests of the author: commitment as it figures in the contexts of threats, promises, bargaining and self-command, the dynamics of social segregation, arms control and climate change. The book will be of interest to philosophers of economics, rational choice theory, game theory, ethics, political theory and environmental philosophy.

Strategies of Commitment contains a total of nineteen essays grouped in eight chapters. Two chapters will serve as focal points of this discussion: the opening chapter which gives title to the collection and section number three under the heading, “Commitment as Self-Command.”

If one fails a commitment, on this view, one fails as a moral being and possibly, echoing more recent versions of the account, scathes one’s own practical identity. The other chain of associations begins with Hobbes’s idea that commitments should be made and kept for self-interested reasons. Keeping a commitment is in one’s own interest, on Hobbes’s reckoning, just in case a strong
