Strategy Technology And Public Policy:

Technology and Strategy Richard A. Goodman, Michael W. Lawless, 1994-10-06 In today's complex dynamic competitive landscape management of technology can mean the difference between success and failure. Managers and researchers alike need effective ways to conceptualize and develop technology strategies. Richard Goodman and Michael Lawless provide tools needed to integrate firms' technology capabilities with their competitive direction. Technology and Strategy presents models that help put technology and its market impacts into perspective. It addresses the broad questions of how technology and markets evolve, how technology can re-order the rules of competition, and how it can shift the balance of individual firms' competitive advantage. It also blends topics currently capturing attention in business circles such as Total Quality Management and the resource-based view of the firm into a clear view of technology management programs. Technology and Strategy also describes methods to develop specific strategies to cope with challenges facing executives like evaluating promising but untried new technologies. Using actual case studies from the electronics and bio-tech industries, Goodman and Lawless demonstrate the use of new techniques to formulate strategy, including Technology Mapping and the Innovation Audit. Both were created to help executives choose the approach to technology best suited to their firms' particular capabilities. Offering clear practical guidance through a complex, fast-changing world of competition, this new analysis of technology and strategy is a valuable guide for general managers, R&D and manufacturing managers, strategic planners, and academics.

Wharton on Dynamic Competitive Strategy George S. Day, David J. Reibstein, 2004-08-13 WHARTON ON DYNAMIC COMPETITIVE STRATEGY A valuable contribution, this insightful book makes it clear that strategy is not a one-time search for a sustainable competitive advantage, but a continuous monitoring of the environment, consumers, and competitors, with the object of making the right moves in a dynamically changing competitive landscape. Philip Kotler, S.C. Johnson, Distinguished Professor of International Marketing, J.L. Kellogg Graduate School of Management, Northwestern University. An ambitious and welcomed effort at addressing strategy from an interdisciplinary perspective. Professor Don Lehmann, Columbia University Graduate School of Business. Wharton on Dynamic Competitive Strategy weaves together an unprecedented interdisciplinary analysis of competitive strategies that any global manager should consider indispensable reading. An impressive book. Jon M. Huntsman, Sr. Chairman and CEO, Huntsman Corporation. Provocative and meaningful. Provides an excellent framework for formulating strategy. Sam Morasca, Vice President, Marketing, Shell Oil Products Company. A Rosetta stone for strategy. Read it and keep it by your side. Dale Moss, Executive Vice President, Sales and Marketing, USA British Airways, New York. The competitive challenges facing you are more complex and fast-moving than ever. This environment demands dynamic competitive strategies, strategies that anticipate and adjust to competitors' countermoves, shifting customer demands, and changes in the business world. Wharton on Dynamic Competitive Strategy offers new perspectives on competitive strategy from a distinguished group of faculty at Wharton and other leading business schools.

around the world This book presents the best insights from decades of research in key areas such as competitive strategy simulations game theory scenario planning public policy and market driven strategy It represents the most cohesive collection of insights on strategy ever assembled by a leading school of business Developed for the thinking manager Wharton on Dynamic Competitive Strategy provides deep insights into the true dynamics of competition In contrast to popular quick fix formulas for strategic success this book provides perspectives that will help you better understand the underlying dynamics of competitive interactions and make better strategic decisions in a rapidly changing and uncertain world The insights and approaches presented here are illustrated with real world examples which demonstrate how these approaches can be applied to your strategic challenges These chapters will help you better address key strategic issues such as Anticipating competitors responses using game theory simulations scenario planning conjoint analysis and other tools and designing the best strategy in light of these expected responses Planning for multiple rounds of competition in the way that chess players think through multiple moves Understanding how changes in technology and public policy or moves by competitors can undermine your current advantages or neutralize future advantages Broadening your range of options for reacting to moves by competitors Signaling and preempting rivals This groundbreaking new book will change your view of strategy and give you the tools you need to succeed in a dynamic and intensely challenging world *International Strategic Management and Government Policy* Peter J.
