Striders Universe:

Strider's Universe John Grant, 2014-03-24 Captain Leonie Strider and her crew stranded in a galaxy millions of parsecs from the Solar System have helped the so called Ancient Species of The Wondervale defeat the tyrannical Autarch Nalla But all too soon the remaining warlords are fighting among each other Before too long the genocidal Kaantalech emerges as the new Autarch With the outcome looking desperate for the Ancient Species only Strider and a handful of crewmates decide to remain in The Wondervale to help If she is to lead the Ancient Species to victory and restore order to The Wondervale Strider must not only battle the colossal power of Kaantalech but also find a way to overcome an even older danger that threatens to destroy them all At the publisher's request this title is sold without DRM Digital Rights Management Combining high powered space action a gaggle of bizarre aliens both friend and foe and passions that are all too recognizably human Strider's Universe continues the epic space opera begun in Strider's Galaxy of which Stan Nicholls wrote in Time Out Strider's Galaxy discards restraint and lets rip Unashamedly occupying the pure entertainment end of the spectrum this is a primary colors read exotic extravagant zingy Pipe and slippers science fiction it isn't Strider's Galaxy John Grant, 2014-03-24 In the 25th century the human species long exiled from the devastated Earth sent a fleet of robot probes on voyages of discovery Their objective was to find another planet suitable for terraforming and eventual human habitation Ninety years later across the empty oceans of space the Tau Ceti probe reported success Now in the year 2531 a human expedition led by Captain Leonie Strider sets off from Jupiter orbit to claim humanity's first colony world outside the Solar System But their progress is rudely halted by a hyperspace portal that snatches them millions of parsecs off course and into the middle of a galactic conflict in someone else's galaxy They must decide whether to stay and fight or to try to find their way home But first they must survive At the publisher's request this title is sold without DRM Digital Rights Management Strider's Galaxy discards restraint and lets rip Unashamedly occupying the pure entertainment end of the spectrum this is a primary colors read exotic extravagant zingy Pipe and slippers science fiction it isn't Stan Nicholls Time Out **Artificial Space** Alex D. Lorenzo, In a future where technological advances have brought humanity to the pinnacle of interstellar exploration a forgotten threat reemerges from the shadows Artificial Space tells the story of Nicholas Quantum a brilliant scientist and disgraced hero who must confront the consequences of his own creation an artificial intelligence that has evolved beyond human limits When signs of a spatial disturbance point to an imminent threat Nicholas embarks on a mission that will take him to the outer reaches of the solar system Accompanied by a young prodigy and a limited crew he must explore abandoned stations confront mechanical horrors and uncover the remnants of a war that never ended In this work the line between creator and creation blurs and the central question can humanity control what it has created becomes the moral axis of a story that combines hard science fiction technological action and profound ethical dilemmas surrounding artificial intelligence *Triworlds Revolution* A. is grown from a randomly mutated digital mind seed in the conceptory of Konishi polis Yatima explores the Coalition of Polises the network of computers where most life in the solar system now resides and joins a friend Inoshiro to borrow an abandoned robot body and meet a thriving community of fleshers in the enclave of Atlanta Twenty one years later news arrives from a lunar observatory gravitational waves from Lac G 1 a nearby pair of neutron stars show that the Earth is about to be bathed in a gamma ray flash created by the stars collision an event that was not expected to take place for seven million years Yatima and Inoshiro return to Atlanta to try to warn the fleshers but meet suspicion and disbelief Some lives are saved but the Earth is ravaged In the aftermath of the disaster the survivors resolve to discover the cause of the neutron stars premature collision and they launch a thousand polises into interstellar space in search of answers This diaspora eventually reaches a planet subtly transformed to encode a message from an older group of travellers a greater danger than Lac G 1 is imminent and the only escape route leads beyond the visible universe **The Origins of Creativity** Edward O.

Wilson, 2017-10-03 Brimming with ideas *The Origins of Creativity* approaches creativity scientifically but sensitively feeling its roots without pulling them out Economist In a stirring exploration of human nature recalling his foundational work Consilience Edward O. Wilson offers a luminous Kirkus Reviews reflection on the humanities and their integral relationship to science Both endeavors Wilson argues have their roots in human creativity the defining trait of our species By studying fields as diverse as paleontology evolution and neurobiology Wilson demonstrates that creative expression began not 10 000 years ago as we have long assumed but more than 100 000 years ago in the Paleolithic Age A provocative investigation into what it means to be human *The Origins of Creativity* reveals how the humanities have played an unexamined role in defining our species With the eloquence optimism and pioneering inquiry we have come to expect from our leading biologist Wilson proposes a transformational Third Enlightenment in which the blending of science and humanities will enable a deeper understanding of our human condition and how it ultimately originated *From Biped to Strider* D. Jeffrey Meldrum, Charles E. Hilton, 2011-06-27 The inspiration for this volume of contributed papers stemmed from conversations between the editors in front of Chuck Hilton's poster on the determinants of hominid walking speed presented at the 1998 meetings of the American Association of Physical Anthropologists (AAPA) Earlier at those meetings Jeff Meldrum with Roshna Wunderlich had presented an alternate interpretation of the Laetoli footprints based on evidence of midfoot flexibility As the discussion ensued we found convergence on a number of ideas about the nature of the evolution of modern human walking From the continuation of that dialogue grew the proposal for a symposium which we called *From Biped to Strider: the Emergence of Modern Human Walking* The symposium was held as a session of the 69th annual meeting of the AAPA held in San Antonio Texas in 2000 It seemed to us that the study of human bipedalism had become overshadowed by the often polarized debates over whether australopithecines were wholly terrestrial in habit or retained a significant degree of arboreality
