the Hugos is a book about the renowned science fiction award for the many who enjoyed Jo Walton's previous collection of writing from Tor.com the Locus Award winning What Makes This Book So Great The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been presented since 1953 They are widely considered the most prestigious awards in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000 Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton's cheerfully opinionated and vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to Among Others It's very good It's great New York Times bestselling author Cory Doctorow Boing Boing on What Makes This Book So Great [The Hard SF Renaissance](#) David G. Hartwell, 2025-09-23 A major anthology of the hard SF subgenre arguing that it's not only the genre's core but also its future Something exciting has been happening in modern science fiction After decades of confusion many of the field's best writers have been returning to the subgenre called roughly hard SF science fiction focused on science and technology often with strong adventure plots Now World Fantasy Award winning editors David G Hartwell and Kathryn Cramer present an immense authoritative anthology that maps the development and modern day resurgence of this form argues for its special virtues and present preeminence and entertains us with some spectacular storytelling along the way Included are major stories by contemporary and classic names such as Poul Anderson Stephen Baxter Gregory Benford Ben Bova David Brin Arthur C Clarke Hal Clement Greg Egan Joe Haldeman Nancy Kress Paul McAuley Frederik Pohl Alastair Reynolds Kim Stanley Robinson Robert J Sawyer Karl Schroeder Charles Sheffield Brian Stableford Allen Steele Bruce Sterling Michael Swanwick and Vernor Vinge The Hard SF Renaissance is an anthology that SF readers will return to for years to come At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied **Tool of the Trade** Joe Haldeman, 2014-12-02 By the author of The Forever War Caught between the USSR and the United States a professor fights to create a better world Nicholas Foley survived the horrific siege of Leningrad Since World War II ended he has risen through the ranks of American academia to his current post as a respected university professor with a loving wife His one secret He works for the KGB Foley acts as a sleeper agent for the Russians pointing out potential talent for recruitment This precarious position takes a turn for the deadly when Foley creates an invention that will change the world a device that makes people obey orders no matter what The fate of the world is balanced on a razor's edge As both superpowers pursue Foley doing whatever they can to get their hands on his miraculous superweapon he realizes he must choose a side Nebula and Hugo Award winner Joe Haldeman is one of America's finest creators of science fiction and Tool of the Trade is a masterful adventure This ebook

features an illustrated biography of Joe Haldeman including rare images from the author's personal collection **The Coming** Joe Haldeman, 2016-09-27 A dystopian future Earth is thrown into turmoil by the imminent arrival of extraterrestrials in this alien contact novel by the author of *The Forever War*. With *The Coming*, multiple Hugo and Nebula Award-winning science fiction Grand Master Joe Haldeman ingeniously combines a troubling dark vision of a dystopian near future with an alien first encounter tale as thrilling and thought provoking as Carl Sagan's *Contact* and Steven Spielberg's *Close Encounters of the Third Kind*. Despite technological advancements designed to alleviate the stress of everyday life, Earth at the midpoint of the twenty-first century is plagued by environmental crisis and manmade catastrophe. Tensions among the nations of Europe bring the threat of World War III closer by the hour as their lands are also ravaged by devastating climatic upheaval, the result of centuries of unchecked ozone depletion and global warming. Meanwhile, in America, whose population has been sedated by DNA-specific drugs and virtual porn, homosexuality and free sexual expression have been outlawed by a repressive federal government led by an inept media star president. But everything changes on October 1, 2054, when Professor Aurora Bell, an astrophysicist at the University of Florida, picks up a message from deep space: "We're coming." Ingeniously told from the viewpoints of a diverse cast of characters ranging from scientists, artists, and ordinary citizens to criminals, con men, and politicians, *The Coming* is a shockingly prescient work of speculative fiction from the multiple award-winning author of *The Forever War* and the acclaimed *Worlds* series, taking the alien invasion story to places it has never gone before. Science Fiction: The Year's Best (2006 Edition) Joe Haldeman, Alastair Reynolds, 2014-01-08 Horton's elegiac anthology of 15 mostly hard SF stories illuminates a broad spectrum of grief over love thwarted through time-space, human frailty, or alien intervention, from the gentle melancholy of Michael Swanwick's *Triceratops Summer*, which posits tame Technicolored time-warped dinosaurs in Vermont, to newcomer Leah Bobet's *Bliss*, an agonizing riff on near-future drug addiction. Several selections address current political/social issues like Mary Rosenblum's *Search Engine*, which extrapolates today's technology to chilling Big Brotherly results. The long closing story, Alastair Reynolds's *Understanding Space and Time*, however, presents a ray of cosmic hope: the sole survivor of a plague that decimated humanity is rescued and healed by intergalactic entities and lives out millennia while seeking ultimate truths, returning to see mankind regenerated. This anthology reflects the concerns of the genre today and the apparent inability of our society to do anything about them. *Publishers Weekly*
