Wolberg, 2014-08-01 Freud once humorously remarked that Anyone who wants to make a living from the treatment of nervous patients must clearly be able to do something to help them It is amazing how frequently this simple precept is ignored and when a patient does not get well how often the failure is attributed to lack of proper motivation diminutive ego strength latent schizophrenia and a multitude of assorted resistances Difficulties that arise during therapy are not due to a deliberate conspiracy of neglect on the part of the therapist They usually come about because of obstructive situations that develop in work with patients with which the therapist is unprepared to cope During his psychiatric career the author who spent time both teaching and supervising collected and collated questions from students and graduate therapists who had raised concerns about psychotherapy that related to such

obstructive situations Originally published in 1982 this volume contains both those questions and his answers *Behaviour Therapy Nursing* Philip J. Barker, 2025-09-17 The behavioural approach in nursing practice is the main concern of this book originally published in 1982 Although the discussion concentrates on the fields of psychiatry and learning disabilities it is also relevant to other areas of nursing such as the care of the elderly or of sick children The book traces the development of behaviour therapy from its beginnings in the experimental laboratory work of Pavlov Skinner and Watson to the more recent influences of social learning theory A survey is made of the major stages in the therapy process and this is followed by a detailed description of possible types of treatment In conclusion some of the more controversial issues raised in this book are reconsidered along with their implications **Handbook of Social Skills Training and Research** Luciano

L'Abate, Michael A. Milan, 1985-05-10 The first up to date comprehensive handbook covering the practical approaches to social skills training SST a relatively new concept encompassing a broad range of treatment and counseling approaches designed to help people conduct their social lives more effectively Leading experts summarize the applications of SST and research to special populations special problems couples and families individuals parents and professionals in the United States and Europe Incorporates both behavioral and humanistic approaches Psychological Treatment of Older Adults Michel Hersen, Vincent B. Van Hasselt, 2013-06-29 This multiauthored introductory textbook could not have been conceived or brought to fruition 10 or 15 years ago Indeed at that time relatively little attention was accorded to the psychological needs of older adults The general tenor of the field then was that older adults would not benefit from psychological intervention As we now know this was a faulty assumption that has been discredited with empirical data Indeed clinical research data adduced primarily in the last decade clearly documents that older adults do benefit from specific psychotherapies that are tailored to their unique presentation of symptoms Given the explosion of interest in this area as evinced by increased investigatory activity national funding and media attention and the increased number of masters and doctoral level courses devoted to this topic we felt that the time was right for a textbook in the area Such flurry of activity also has been fueled by statistics showing how our population by the year 2030 will consist of 30% who are senior citizens Moreover since 12% of older adults in the community are estimated to have diagnosable psychiatric disorders and 40% to 50% of older adult medical inpatients have a concomitant psychiatric disorder the task for clinicians in the next century will be overwhelming
