Mike Jess

Slash And Burn Farming In The Third World Forest:

Slash and Burn William John Peters, Leon F. Neuenschwander, 1988 Dynamic and Stochastic Approaches to the Environment and Economic Development Amitrajeet A. Batabyal, 2008 This book is a collection of Amitrajeet A Batabyal's most important papers on the environment and economic development This book's uniqueness stems from the fact that it uses novel modeling tools that are largely unfamiliar to economists to shed valuable light on contemporary problems at the interface of the environment and economic development **Proceedings of the Session on Tropical Forestry for People of the Pacific, XVII Pacific Science Congress, May 27-28, 1991, Honolulu, Hawaii**, 1992 *Tropical Forests and Their Crops* Nigel J. H. Smith, J. T. Williams, Donald L. Plucknett, Jennifer P. Talbot, 2018-05-31 The tropics are the source of many of our familiar fruits vegetables oils and spice as well as such commodities as rubber and wood Moreover other tropical fruits and vegetables are being introduced into our markets to offer variety to our diet Now as tropical forests are increasingly threatened we face a double fold crisis not only the loss of the plants but also rich pools of potentially useful genes Wild populations of crop plants harbor genes that can improve the productivity and disease resistance of cultivated crops many of which are vital to developing economies and to global commerce Eight chapters of this book are devoted to a variety of tropical crops beverages fruit starch oil resins fuelwood fodder spices timber and nuts the history of their domestication their uses today and the known extent of their gene pools both domesticated and wild Drawing on broad research the authors also consider conservation strategies such as parks and reserves corporate holdings gene banks and tissue culture collections and debt for nature swaps They stress the need for a sensitive balance between conservation and the economic well being of local populations If economic growth is part of the conservation effort local populations and governments will be more strongly motivated to save their natural resources Distinctly practical and soundly informative this book provides insight into the overwhelming abundance of tropical forests an unsettling sense of what we may lose if they are destroyed and a deep appreciation for the delicate relationships between tropical forest plants and people around the world **Tropical Forests and Climate** N. Myers, 2013-06-29 Tropical forests affect climate and the removal of the forests will change climate Or not This book discusses basic questions on how far if at all tropical deforestation leads to climatic change The question of this uncertainty is particularly addressed One important consequence of the uncertainties of whether deforestation affects climate is how scientific findings best illuminate the policy making process **Sediment Records of Biomass Burning and Global Change** James S. Clark, Helene Cachier, Johann G. Goldammer, Brian J. Stocks, 2013-06-29 Biomass burning profoundly affects atmospheric chemistry the carbon cycle and climate and may have done so for millions of years Bringing together renowned experts from paleoecology fire ecology atmospheric chemistry and organic chemistry the volume elucidates the role of fire during global changes of the past and future Topics covered include the characterization of combustion products that occur in sediments including char soot fly ash and polycyclic aromatic hydrocarbons the calibration

of these constituents against atmospheric measurements from wildland and prescribed fire emissions spatial and temporal patterns in combustion emissions at scales of individual burns to the globe *The Economics and Ecology of Biodiversity Decline* Timothy M. Swanson, 1998-06-25 Essays by economists and ecologists debate the causes and consequences of biodiversity decline Shifting Cultivation in Thailand, Laos and Vietnam Stephen Bass, Stephen C. Bass, Elaine Morrison, 1994 **Introduction to Forests and Renewable Resources** Chad P. Dawson, John C. Hendee, 2019-10-24 The introductory course in natural resources is broader and more diverse than ever Today's students need to know how to manage forest wildlife watershed and range resources in a variety of environments and serving the needs of myriad stakeholders To that end Chad Dawson has built on the foundation established by him and the late John Hendee to bring *Introduction to Forests and Renewable Resources* thoroughly up to date The Ninth Edition has been reorganized to better address content for example policy and the differences between managing federal state and private land that applies to all resources While forests continue to be emphasized more coverage is provided to other resources and to achieving management goals for multiple resources when considering topics like fire and recreation *The Causes of Tropical Deforestation* Katrina Brown, David W. Pearce, 2023-05-26 *The Causes of Tropical Deforestation* 1994 is an analysis of the problem of deforestation using statistical technique a form of environ metrics to discover the true causes of an issue whose basis is hotly debated and attributed to causes as varied as poverty external debt multinational logging companies government corruption the IMF population growth and non sustainable agriculture
