Goodpastor, Gen Rtd, Andrew J Goodpastor, 2019-06-21 The European Security Study ESECS published its Report on Strengthening Conventional Deterrence in Europe in May 1983 The Study was prompted by concern about the relation of NATO dependence on the early use of nuclear weapons to its primary purpose of maintaining secure peace with freedom in the NATO region **Securing Europe's Future** Stephen J. Flanagan, Fen Osler Hampson, 2021-01-26 This book first published in 1986 analyses a number of emerging enduring and neglected issues that affected European security and the stability of the Atlantic Alliance at the end of the Cold War It provides a comprehensive review of the major political social and economic issues that shaped the course of European security It offers a thorough assessment of such critical questions as European views of the US Strategic Defense Initiative the contribution of new technologies and tactics to NATO's conventional defence capabilities and domestic factors that influenced security policy It also provides original analysis of a number of issues such as economic dimensions of security the quest for a European defence identity and protection of Western interests outside the NATO area It provides a review of the nuclear question and of the German security debate in the aftermath of the initial US INF missile deployments *Strengthening Conventional Deterrence in Europe* European Security Study, 1983 **Rethinking the Nuclear Weapons Dilemma in Europe** P. European Peace Movements and the Future of the Western Alliance Walter Laqueur, Robert Edwards Hunter, 1985-01-01 This extraordinary compendium concerns the future of the Western alliance and the development of the peace movements in Europe and in the United States After a long postwar marriage Europeans and Americans alike are reexamining the premises of the Western alliance This volume contributes to this reexamination Paul Rogers: A Pioneer in Critical Security Analysis and Public Engagement Paul Rogers, 2018-07-30 This book brings together a collection of writings over the past half century from Professor Paul Rogers As a leading peace researcher he has gained an international reputation for the critical independent and rigorous analysis of international security and the underlying causes of global conflict His work on the responses to 9 11 and the continuing failure of the war on terror in particular has shown prescience that has attracted widespread attention Moreover he has coupled his academic analysis with a determination to communicate widely beyond the university environment With many thousands of radio and television interviews hundreds of public lectures and a world wide following for his web publishing this extramural engagement consistently seeks to raise the level of public debate on international security issues Provides a radically different perspective on global security based on 50 years of analysis Uniquely integrates economic environmental and security analysis into a single overview Cogently demonstrates the urgent need to rethink our entire approach to global security Alternative Military Strategies For The Future Keith A.

Dunn,2019-03-04 In this volume prominent civilian and military experts in defense representing the maritime continental coalition military reform and noninterventionist schools of thought outline the changes in military strategy policy and force structure that they believe the United States must adopt if it is to cope successfully with threats to national security in the 1980s and 1990s The authors analyze US interests and objectives the changing strategic environment and the major security threats facing the United States in the coming decades They also discuss what they believe is the proper mix of political economic and military instruments for dealing with fixture threats The alternative strategies they present are wide ranging and comprehensive running the gamut from a strategic withdrawal from global commitments to proposals for increasing US power projection and forcible entry capabilities in the Third World In many ways the chapters are critical of current and past approaches to military strategy The authors believe it is essential that strategists understand the existing critiques of current U S military strategy in order to make the correct policy decisions for the future **Strengthening Conventional**

Deterrence in Europe European Security Study,1983 Rapport fra European Security Study Over for et massivt sovjetisk angreb vil NATO muligvis v re tvunget til en tidlig inds ttelse af taktiske atomv ben med risiko for en eskalation til total kernev benkrig Denne afh ngighed af atomv ben kunne formindskes hvis NATO udbyggede sine konventionelle styrker

Strategic Review ,1983 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States **Deterring Russia in Europe** Nora Vanaga,Toms Rostoks,2018-09-21 This edited volume examines deterrence and the defense efforts of European states neighboring Russia following the Crimean intervention Deterrence after being largely absent from debates among academics and policy makers for almost a quarter of a century has made a comeback in Europe Since Russia s annexation of Crimea and the start of the military conflict in Ukraine s Donbass region eastern and northern European states have revised their assessments of Russia s policies and intentions The approach used by Russia in Ukraine has rendered lessons learned from the Cold War deterrence only partially applicable due to the changing security situation in Europe The emergence of the cyber realm a smaller emphasis on nuclear deterrence and the ideological conflict between Russia and the West are among the key differences between the Cold War and the current security environment Structured into two parts the first part discusses conceptual aspects of deterrence while the second discusses ten country case studies which include both NATO and non NATO countries This allows for an in depth analysis of the changing character of deterrence and its practical application by Russia s European neighbours This volume will be of much interest to students of strategic studies European politics Russian foreign policy security studies and international relations in general Essays on Arms Control and National Security Bernard F. Halloran,1986 These essays collected to commemorate the Arms Control and Disarmament Agency s 25th anniversary span not only ACDA s lifetime but the four decades of the nuclear era The articles provide a sampling of the arms control related speculation and controversy that has existed during those years Since many of the authors are either current members of the

U S Government or have strongly influenced its policy over the years these essays on the formulation of U S arms control and national security policies have almost assumed the status of classics The authors represented include Fred Ikle Henry Rowen Paul Nitze George Kennan Robert McNamara Thomas Schelling Albert Wohlstetter and James Schlesinger S N 044 000 02164 1 12 00

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it

Parameters, 1986 *Defending Europe* Derek Paul, 2021-01-26 This book first published in 1985 examines the questions of European security that lie at the heart of the confrontation between the superpowers It concentrates on ways of achieving defence by conventional means rather than a reliance on nuclear or chemical weapons and at the same time focuses on possible force reductions

West European Pacifism and the Strategy for Peace Peter Van Den Dungen, 1985-06-18 *Alternative Defence Policy* Gordon Burt, 2021-05-30 This book first published in 1988 represents a unique attempt to combine a discussion of an alternative British defence policy in terms of military strategy and new technology with a consideration of how this policy might be secure in political terms Written against a background of a possible future Labour government in the late 1980s with a radically different defence policy to the Conservative Government of the day it considers questions such as Would conventional deterrence really be effective Just what is the Labour Party s defence policy How precisely might Britain be transformed into a non aligned non militarist state
