The Social Production of Scientific Knowledge E. Mendelsohn, P. Weingart, R.D. Whitely, 1977-04-30 **The Social Production of Scientific Knowledge** Everett Mendelsohn, Peter Weingart, Richard Whitley, 1977 *The Social Production of Scientific Knowledge* E. Mendelsohn, P. Weingart, R.D. Whitely, 2012-03-01 The Social Production of Scientific Knowledge Everett MENDELSON, 1977 *States of Knowledge* Sheila Jasanoff, 2004 Discusses the relationship between scientific knowledge and political power Develops the theme of co production showing how scientific knowledge both embeds and is embedded in social identities institutions representations and discourses International Scientific Relations Francisco Del Canto Viterale, 2021-08-17 *International Scientific Relations* offers a holistic analysis of the role and impact of science technology and innovation in the international system of the twenty first century **Island Time** John N. Parker, 2026-02-28 Theory groups are small research groups who develop a new scientific theory and work together to promote its acceptance by the scientific community This book offers a pioneering analysis of theory groups by reconceptualizing them as socio emotional collectives characterized by evocative group cultures and emergent small group processes that enable their members to conceptualize new theories and champion new intellectual movements that cut against the status quo in their fields Utilising data from a fifteen year multi sited ethnography of a theory group in sustainability science it investigates the significance of faith solidarity fun and flow episodes for developing transformative science Chapters also explore the importance inter generational group dynamics for advancing new theories and of specific geographic locations such as remote islands for fostering creativity This gripping first hand account is an essential read for those wishing to understand the conditions that support transformative scientific creativity and the social dynamics of intellectual movements **Scientific Knowledge** Barry Barnes, David Bloor, John Henry, 1996-07-15 Although science was once seen as the product of individual great men working in isolation we now realize that like any other creative activity science is a highly social enterprise influenced in subtle as well as obvious ways by the wider culture and values of its time *Scientific Knowledge* is the first introduction to social studies of scientific knowledge The authors all noted for their contributions to science studies have organized this book so that each chapter examines a key step in the process of doing science Using case studies from cognitive science physics and biology to illustrate their descriptions and applications of the social study of science they show how this approach provides a crucial perspective on how science is actually done *Scientific Knowledge* will be of interest not only to those engaged in science studies but also to anyone interested in the practice of science *Governing and Managing Knowledge in Asia* Thomas Menkhoff, Hans-Dieter Evers, Yue Wah Chay, 2005 The spread of knowledge is a significant consequence of the process of globalization Knowledge is used to tackle very diverse issues such as development challenges in emerging markets or the perplexity of corporate decision makers in the business world The creation and proper governance of actionable knowledge and intellectual capital have become key preconditions

for sustained societal and corporate competitiveness in an era of rapid globalization presenting new opportunities and challenges for policy makers business leaders managers and employees in both public and private sector organisations This helpful book analyzes both the theoretical and practical aspects of effective knowledge governance and knowledge management in the context of an increasingly competitive globalized marketplace Several case studies of Asian countries and organizations are presented aimed at analyzing factors impacting the governance of knowledge and exemplifying practices that policy makers and business leaders adopted to manage knowledge resources and knowledge processes to their fullest potential *The Manufacture of Knowledge* K.D. Knorr-Cetina, 2013-10-22 The anthropological approach is the central focus of this study Laboratories are looked upon with the innocent eye of the traveller in exotic lands and the societies found in these places are observed with the objective yet compassionate eye of the visitor from a quite other cultural milieu There are many surprises that await us if we enter a laboratory in this frame of mind This study is a realistic enterprise an attempt to truly represent the social order of life in laboratories and institutes of research just as they are By bringing the philosophical issues to the surface as matters not of prejudgement but as matters of concern Karin Knorr Cetina has developed the first really positive challenge to the philosophy of science since the days of paradigms and internal definitions of meanings

Research Handbook on International Law and Cities Aust, Helmut P., Nijman, Janne E., Marcenko, Miha, 2021-08-27 This groundbreaking Research Handbook provides a comprehensive analysis and assessment of the impact of international law on cities It sheds light on the growing global role of cities and makes the case for a renewed understanding of international law in the light of the urban turn **Governing And Managing Knowledge In Asia (2nd Edition)** Thomas

Menkhoff, Hans-dieter Evers, Yue Wah Chay, 2010-01-29 The field of knowledge for development now occupies a top position on the agenda of all Asian governments as well as large development organizations This book reflects this mega trend of development towards KBEs Knowledge Based Economies For this 2nd edition all chapters have been thoroughly edited and data tables and graphs have been updated to reflect the latest available statistics Trends have been re evaluated and adjusted to reflect recent developments in the fast moving scene of knowledge governance and knowledge management

Selforganization W. Krohn, Gunter Küppers, H. Nowotny, 2013-03-09 may be complex without being able to be replaced by something still more simple This became evident with the help of computer models of deterministic recursive systems in which simple mathematical equation systems provide an extremely complex behavior 2 Irregularity of nature is not treated as an anomaly but becomes the focus of research and thus is declared to be normal One looks for regularity within irregularity Non equilibrium processes are recognized as the source of order and the search for equilibrium is replaced by the search for the dynamics of processes 3 The classical system environment model according to which the adaptation of a system to its environment is controlled externally and according to which the adaptation of the system occurs in the course of a learning process is replaced by a model of systemic closure This closure is operational in so far as the effects produced by the system

are the causes for the maintenance of systemic organization If there is sufficient complexity the systems perform internal self observation and exert self control Cognition as understood by Maturana as self perception and self limitation e g that of a cell vis a vis its environment 22 But any information a system provides on its environment is a system internal construct The reference to the other is merely a special case of self reference The social sciences frequently have suffered from the careless way in which scientific ideas and models have been transferred

Cambridge Handbook of Strategy as Practice

Damon Golsorkhi, Linda Rouleau, David Seidl, Eero Vaara, 2010-08-26 The Cambridge Handbook of Strategy as Practice provides a comprehensive overview of an emerging and growing stream of research in strategic management An international team of scholars has been assembled to produce a systematic introduction to the various epistemological methodological and theoretical aspects of the strategy as practice approach This perspective explores and explains the contribution that strategizing makes to daily operations at all levels of an organization Moving away from a disembodied and asocial study of firm assets technologies and practices the strategy as practice approach breaks down many of the traditional paradigmatic boundaries in strategy to investigate who the strategists are what strategists do how they do it and what the consequences or outcomes of their actions are Including a number of detailed empirical studies the handbook will be an essential guide for future research in this vibrant field

Scientific Rationality: The Sociological Turn

J.R. Brown, 2013-11-11 **The Power of Crisis Communication** Janina Klingelhöfer, 2023-12-28 Janina Klingelhöfer deconstructs the development of the scientific field of crisis communication through the lens of the sociology of knowledge To integrate both the social and intellectual dimensions of this scientific field she unites the theoretical considerations of Bourdieu's field analysis with the concepts of habitus and capital with a Foucauldian discourse analysis to conduct a comprehensive qualitative historiography The study reflects on the beginnings of the field and its past developments to answer the main research question How did the scientific field of crisis communication become what it is today

Handbook of Research on Industrial Advancement in Scientific Knowledge Diaz, Vicente González-Prida, Bonilla, Jesus Pedro Zamora, 2019-01-18 In a society that praises and promotes technological advancement it becomes increasingly essential to review the effects of such rapid technological growth New high tech advances need to be examined to determine what they mean to science society and industry along with the benefits and challenges they present The Handbook of Research on Industrial Advancement in Scientific Knowledge addresses the intersection of technology and science where engineering considerations mathematical approaches and management tools provide a better understanding and awareness of Industry 4.0 while also taking into account the impact on current society This publication identifies methodologies and applications related to decision making risk and uncertainty and design and development not only on scientific and industrial topics but also on social and ethical matters It is designed for engineers entrepreneurs academicians researchers managers and students

The Problem of Relativism in the

Sociology of (Scientific) Knowledge Richard Schantz, Markus Seidel, 2013-05-02 This volume comprises original articles by

leading authors from philosophy as well as sociology in the debate around relativism in the sociology of scientific knowledge Its aim has been to bring together several threads from the relevant disciplines and to cover the discussion from historical and systematic points of view Among the contributors are Maria Baghramian Barry Barnes Martin Endre Hubert Knoblauch Richard Schantz and Harvey Siegel The Concise Encyclopedia of Sociology George Ritzer,J. Michael Ryan,2010-12-03 This concise encyclopedia is the most complete international survey of sociology ever created in one volume Contains over 800 entries from the whole breadth of the discipline Distilled from the highly regarded Blackwell Encyclopedia of Sociology with entries completely revised and updated to provide succinct and up to date coverage of the fundamental topics Global in scope both in terms of topics and contributors Each entry includes references and suggestions for further reading Cross referencing allows easy movement around the volume Geography, Science and National Identity Charles W. J. Withers,2001-10-04 Charles Withers book brings together work on the history of geography and the history of science with extensive archival analysis to explore how geographical knowledge has been used to shape an understanding of the nation Using Scotland as an exemplar the author places geographical knowledge in its wider intellectual context to afford insights into perspectives of empire national identity and the geographies of science In so doing he advances a new area of geographical enquiry the historical geography of geographical knowledge and demonstrates how and why different forms of geographical knowledge have been used in the past to constitute national identity and where those forms were constructed and received The book will make an important contribution to the study of nationhood and empire and will therefore interest historians as well as students of historical geography and historians of science It is theoretically engaging empirically rich and beautifully illustrated
