**Human Services** Jeane W. Anastas, 2000-01-28 Research Design for Social Work and the Human Services integrates a range of research techniques into a single epistemological framework and presents a balanced approach to the teaching of research methods in the helping professions Jeane W Anastas begins with a discussion of the different philosophical perspectives within which social research occurs and continues with problem formulation research design and methodological issues influencing data collection analysis and dissemination She presents both fixed quantitative and flexible qualitative methods of research granting legitimacy value utility and relevance to both styles of inquiry Utilizing complete case studies to illustrate different methodological approaches Research Design for Social Work and the Human Services integrates material on women and people of color and draws attention to the ways racism heterosexism sexism and classism affect the conceptualization and conduct of research Anastas not only exposes these biases but actively addresses the experiences needs and concerns of clients of both genders and different races ethnicities sexual orientations cultures and classes **Social Support Networks**

James K. Whittaker, James Garbarino, This book offers for the first time a clear conception of what social support networks are why they are important how they are identified and sustained where they fit in an overall framework of human services and their limits and potential in selected fields of practice Individual chapters explore child adolescent and family services daycare and early childhood development divorced and stepfamilies schools delinquency prevention and treatment mental health service to the elderly development disabilities healthcare and health promotion and drug treatment The use of social support networks extended family friends neighbors and other informal helpers is an idea whose time has come in the human services field At a time when spiraling costs and popular sentiment weigh against any major expansion of services it is apparent that a service strategy based primarily on the notion of professional helping delivered on a case by case basis usually in a one to one relationship has serious limitations Professional response to this major work has been uniformly positive The editors have assembled a book of considerable importance brilliant in both scholarship and construction will appeal to a broad readership Gerald Euster University of South Carolina offers a much needed balance to the focus on individual and internal dynamics which has characterized social work education for several decades Eleanor Reardon Tolson University of Chicago Social Support Networks is a valuable contribution a unique original and authoritative book an exciting timely and definitely practice oriented book with a strong theoretical and research base Anthony N Maluccio University of Connecticut James K Whittaker is professor of social work at the University of Washington A former childcare worker therapist and administrator in residential childcare he has been a consultant to governmental and voluntary children s agencies throughout the United States James Garbarino is Elizabeth Lee Vincent Professor of Human Development in the College of Human Ecology at Cornell University He was president of the Erikson Institute for Advanced Study in Child

Development Chicago Illinois from 1985 to 1994 He is the co author of Troubled Youth Troubled Families also available from AldineTransaction

**Support Networks in a Caring Community** J.A. Yoder,J.M.L. Jonker,R.A.B. Leaper,2012-12-06 The historic Binnenhof seat of the Dutch government in The Hague provided the setting January 1985 for a conference in which participants from eleven countries met to consider the theme Support networks in a caring community research and policy fact and fiction At the outset conference leadership provided by Professors J M L Jonker The Netherlands and R A B Leaper United Kingdom urged the conferees not to allow their enthusiasm for informal support networks to combine with the pervasive awareness of the failures of welfare states into a simplistic stance of advocacy with a consequent appeal to politicians to direct state funds accordingly Legitimate criticisms of the responses of welfare states to the needs of citizens were to be seen as the context for discussion not the substance of conference deliberations More specifically if it is now apparent to many people that governmental assistance of individuals with social needs can lead to an undesirable dependency on the part of increasingly passive citizens that awareness does not lend logical support to an ideological position that governmental expenditures are pernicious per se to be replaced as rapidly as possible by a return to reliance on self family friends and associations that are developed voluntarily and financed by those who are sufficiently interested

Restorative and Responsive Human Services Gale Burford,John Braithwaite,Valerie Braithwaite,2019-03-04 In Restorative and Responsive Human Services Gale Burford John Braithwaite and Valerie Braithwaite bring together a distinguished collection providing rich lessons on how regulation in human services can proceed in empowering ways that heal and are respectful of human relationships and legal obligations The human services are in trouble combining restorative justice with responsive regulation might redeem them renewing their well intended principles Families provide glue that connects complex systems What are the challenges in scaling up relational practices that put families and primary groups at the core of health education and other social services This collection has a distinctive focus on the relational complexity of restorative practices How do they enable more responsive ways of grappling with complexity than hierarchical and prescriptive human services Lessons from responsive business regulation inform a re imagining of the human services to advance wellbeing and reduce domination Readers are challenged to re examine the perverse incentives and contradictions buried in policies and practices How do they undermine the capacities of families and communities to solve problems on their own terms This book will interest those who harbor concerns about the creep of domination into the lives of vulnerable citizens It will help policymakers and researchers to re focus human services to fundamental outcomes at the foundation of sustainable democracies This book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Social Work Treatment Francis J. Turner,2017-03-23 First published in 1974 Social Work Treatment remains the most popular and trusted compendium of theories available to social work students and practitioners It explores the full

range of theoretical approaches that drive social work treatment and knowledge development from psychoanalysis to crisis intervention. A treasure trove of practice knowledge, the text equips professionals with a broad array of theoretical approaches, each of which shines a spotlight on a different aspect of the human condition. Emphasizing the importance of a broad-based theoretical approach to practice, it helps readers avoid the pitfalls of becoming overly identified with a narrow focus that limits their understanding of clients and their contexts. This sweeping overview of the field untangles the increasingly complex problems, ideologies, and value sets that define contemporary social work practice. The result is an essential A to Z reference that charts the full range of theoretical approaches available to social workers regardless of their setting or specialty.

**Environmental Practice in the Human Services** Bernard Neugeboren, 2013-01-11

*Environmental Practice in the Human Services* points to the need for the human services to return to their historic mission of environmental change. It moves beyond the more general conceptual emphasis on person in environment toward the development of an environmental practice technology based on an intervention model which prescribes specific micro and macro roles and functions. It may open the way to recapturing the conceptual breadth which characterized the first 40 years of social work as a professional and occupational entity. The ecological perspective in social work has fostered an interest in the impact of social environments on service consumers. *Environmental Practice in the Human Services* tries to rectify the historical imbalance in the human services that has emphasized people changing methods, giving secondary emphasis to environmental change. It instructs students preparing for practice in the human services as well as agency practitioners in the knowledge and skills necessary in environmental practice. Cases in environmental practice are used to illustrate how these skills are utilized in actual practice situations. The book's scope includes practice at the direct service, administration, planning, and social policy levels; it integrates micro and macro practice and shows how these two levels of practice are interdependent. This enables human service practitioners to create and/or modify social environments to enhance the functioning of clients being served in human service programs. Topics covered include important skills in environmental practice including decisionmaking, negotiating, and leadership; community practice and resource coordination; social support; the impact of organizational environments on practice; environmental practice for the chronically disabled. Author Neugeboren's approach is unique in its in-depth focus on environmental practice, applying concepts of social environment to specific practice roles. This practice-specific content, which provides tools needed for environmental practice, is in contrast to existing texts on the social environment which are very theoretical and not integrated with practice. He includes material from the field of social ecology which has not been included in existing texts. It shows how practitioners and administrators, planners, and policymakers can facilitate and support each other's work. Reading *Environmental Practice in the Human Services* will enlighten students and practitioners with specific skills for impacting on different social environments to enhance client benefit. It tells how a direct service practitioner can determine which organizational environments are suitable for particular client needs in making

agency referrals It also provides administrators with information about designing planning and managing agencies with functional organizational environments which achieve effective services      Protecting Children and Supporting Families Gary Cameron,Jim Vanderwoerd,Leslea Peirson,1997-01-01 This book highlights encouraging news about programs that produce better outcomes for disadvantaged children and families It includes a comprehensive and up to date synthesis of the research evidence available on the effectiveness of these promising programs Particular attention is given to programs with a demonstrated potential to prevent child abuse and neglect and family breakdown      *The Caring Relationship* Hazel Qureshi,Alan Walker,1989-10-13 This book takes a close look at family relationships at the end of the life cycle Based on a representative sample of people aged 75 or more in a major British city it investigates in depth what the caring relationship actually means to those elderly people and carers mostly family members who are involved on a day to day basis An important book for health and welfare professionals involved in planning and providing services      Social Work Practice in Nontraditional Urban Settings Melvin Delgado,1999 The author suggests that many communities can be best served through their own already established recreational social and cultural centres and shows how professional social workers can use these non traditional settings bars beauty shops and bathhouses to reach out to the communities they are trying to help

*Person-Environment Practice* Susan P. Kemp,James K. Whittaker,Elizabeth M. Tracy, The primary audience for Person Environment Practice is the great majority of social workers whose helping efforts extend to individuals families groups and neighborhoods Its primary aim is to examine each of these levels critically through the prism of environment and to offer practical suggestions for both assessment and intervention      **The Social Networks of Older People** Howard Litwin,1996-10-30 This edited volume examines the social networks of older people in nine countries from a range of perspectives in order to determine the potential of informal support structures to deliver the bulk of care in today s society Researchers from the United States Canada England and Wales France Spain the Netherlands Sweden Finland and Israel present up to date analyses of support networks in each of their countries The social policy implications of the comparative data are critically reviewed The findings clearly suggest that social network availability is diminishing for a significant minority of elderly people However current practice in most countries reveals little purposive interweaving of formal services and informal networks in order to strengthen the function of the latter and to prolong their presumed benefits

**Community Practice** David A. Hardcastle,Patricia R. Powers,Stanley Wenocur,2004 Community Practice is a comprehensive resource for social workers and students eager to learn how to practice effectively in complex systems and diverse communities In this completely revised edition of the definitive text in the field the authors have thoroughly updated each chapter and added two entirely new chapters on community building and community organizing New material on topics such as negotiation and mediation community advocacy participatory rural appraisal the narrative approach to social change community involvement representative client boards and the latest in grassroots endeavors make this text as inspiring as it is

practical Drawing upon the wealth of information available from local organizations the Internet newspapers and academic journals the authors introduce contemporary experiments and analyze classic modes of community practice and change The content exercises and references offer instructors the flexibility necessary to tailor their courses to undergraduate graduate and doctoral level students This new edition will continue to provide a comprehensive and integrated overview of the theory and skills fundamental to all areas of social work practice Broad in scope it offers students as well as practitioners the tools necessary to promote the welfare of individuals and communities      *Professional Child and Youth Care* Roy Ferguson,Carey J. Denholm,Alan R. Pence,1993 Provides an overview of the spectrum of concerns within the field of child care in Canada The book pays particular attention to developments in the field from the mid 1980s to the mid 1990s      **The Routledge**

**Handbook of Health Communication** Teresa L. Thompson,Roxanne Parrott,Jon F. Nussbaum,2011-08-24 The Routledge Handbook of Health Communication brings together the current body of scholarly work in health communication With its expansive scope it offers an introduction for those new to this area summarizes work for those already learned in the area and suggests avenues for future research on the relationships between communicative processes and health health care delivery This second edition of the Handbook has been organized to reflect the goals of health communication understanding to make informed decisions and to promote formal and informal systems of care linked to health and well being It emphasizes work in such areas as barriers to disclosure in family conversations and medical interactions access to popular media and advertising and individual searches online for information and support to guide decisions and behaviors with health consequences This edition also adds an overview of methods used in health communication and the unique challenges facing health communication researchers applying traditional methods to efforts to gain reliable and valid evidence about the role of communication for health It introduces the promise of translational research being conducted by health communication researchers from multiple disciplines to form transdisciplinary theories and teams to increase the well being of not only humans but the systems of care within their nations Arguably the most comprehensive scholarly resource available for study in this area the Routledge Handbook of Health Communication serves an invaluable role and reference for students researchers and scholars doing work in health communication      *Child Mental Health Practice from the Ecological Perspective* Richard L. Munger,1991 The ecological perspective is a contextual approach which works at the interface between families and the broader ecology or ecosystem of the child the approach is not new but has not been widely adopted due to the lack of illustrative material available for practitioners Through an approach more descriptive and explanatory than empirical the author shows the clinician or other child care professional why the child s environment is crucial and provides techniques to draw people in the child s environment into the healing process      *Encyclopedia of Parenting* Charles A. Smith,2013-04-03 Parenting receives growing amounts of attention from researchers and what was once considered chiefly an art is now also recognized for being a science Our knowledge of parenting has increased significantly in the last few

decades new developments continue to happen daily The Encyclopedia of Parenting provides in reference book format what we now know about parents parenting and the parent child relationship synthesized in some 250 alphabetically arranged entries Each entry is written by an expert contributor and provides an authoritative overview of a particular topic Subjects covered include child activity child outcomes child states parent behaviours parental situations external and community factors systematic concerns the transition to parenthood available resources persons who have added to our knowledge of the field Entries draw on a wide range of disciplines including psychology education and sociology Each entry closes with a bibliography and the volume concludes with a selected list of works for further reading

**Home-Based Services for Troubled Children** Ira M. Schwartz, 2016-02-01 There is mounting interest in services to strengthen families and if possible to keep them together preventing unnecessary and costly out of home placements Unfortunately although these programs are proliferating throughout the country many are developing without the benefit of existing historical conceptual and scholarly data information needed to make sound fiscal policy and programmatic decisions This book fills this critical void with a systematic examination of home based services for abused neglected delinquent and emotionally disturbed children and their families With the most authoritative research on the topic to date this book will be of interest to practitioners policymakers and child advocates

**The Handbook of Social Work Direct Practice** Paula Allen-Meares, Charles D. Garvin, 2000 The Handbook of Social Work Direct Practice provides an extraordinarily extensive coverage of all major topics relevant to Clinical Social Work The Contributors to this volume under the leadership of Paula Allen Meares and Charles Garvin guide the reader through discussions about the contexts of social work practice multicultural and diversity issues research as well as assessment and measurement All in all this is the perfect primary text for administration courses in MSW programs BSW programs and doctoral programs Practitioners and professionals in the field will find here all the useful elements a key reference work can provide
