SOCIALIZATION AND COMMUNICATION IN PRIMARY GROUPS. ED. BY THOMAS R. WILLIAMS. , 1975 Children of Different Worlds Beatrice Blyth Whiting, Carolyn P. Edwards, Carolyn Pope Edwards, Carol R. Ember, 1988 The culmination of twenty years of research this book is a cross cultural exploration of the ways in which age gender and culture affect the development of social behavior in children The authors and their associates observed children between the ages of two and ten going about their daily lives in communities in Africa India the Philippines Okinawa Mexico and the United States This rich fund of data has enabled them to identify the types of social behavior that are universal and those which differ from one cultural environment to another Whiting and Edwards shed new light on the nature nurture question in analyzing the behavior of young children they focus on the relative contributions of universal physiological maturation and universal social imperatives They point out cross cultural similarities but also note the differences in experience between children who grow up in simple and in complex societies They show that knowledge of the company children keep and of the proportion of time they spend with various categories of people makes it possible to predict important aspects of their interpersonal behavior An extension and elaboration of the classic *Children of Six Cultures* Harvard 1975 *Children of Different Worlds* will appeal to the same audience developmental psychologists social psychologists anthropologists and educators and is sure to be equally influential Being Female Dana Raphael, 2011-05-12 No detailed description available for Being Female **Political**
