Pevsner: The Complete Broadcast Talks Stephen Games, 2016-04-22 This book brings together the surviving texts of the 113 talks on art and architecture that we know of given by the art historian Sir Nikolaus Pevsner on radio and television between 1945 1977 It includes the seven texts of the 1955 Reith Lectures in their original broadcast form as well as lectures that Pevsner gave in German for the BBC in London and RIAS in Berlin and on the radio in New Zealand These talks are important as an example of the attempt by the BBC in particular to provide intellectual programming for the mass population The talks are important for what they reveal about changing tastes in the treatment of the arts as a broadcast topic as well as offering a case study of the development of one particular historian's approach to a subject that was gaining ground in universities as a direct result of his popularisation of it They show what topics were thought to be central to the artistic agenda in the mid years of the last century whether from an academic or journalistic perspective and reveal the mode and manner of academic engagement with the public over the period Forty six of these talks were published in 2002 on the centenary of Pevsner's birth in a trade edition At the time his reputation as an active force in architectural thinking had long been eclipsed and interest in him had waned Since then there has been a turn around in tastes and Pevsner's role within his chosen field is now being actively studied and discussed by a new generation for whom he is central to an understanding of the 20th century There is therefore a real need for this book In addition to containing twice the number of talks as the previous volume it is supplemented with explanatory introductions footnotes and citations It also reveals as far as this is possible alternative versions of Pevsner's texts as they appeared at different stages in the original production process As such this edition can be relied on by academics as scholarly and

How to Work with an Architect Gerald Lee Morosco, 2006 This book offers advice on working with an architect to rebuild or remodel our home It features prominent architects and their philosophies and ideas including planning checklists and a directory of architects Anyone who has endeavored to remodel or build a home from the ground up knows that the process can be trying at best infuriating at worst That process can be infinitely more enjoyable when you have the benefit of a professional architect's expertise at the ready In *How to Work with an Architect* noted architect and Taliesin Fellow Gerald Lee

Morosco AIA reveals the essential criteria for a successful architect client relationship explaining not only what the benefits of working with an architect are but also showing how an architect adds immeasurable value to a project How to Work with an Architect offers a brief history of the profession with features on prominent architects and their philosophies In addition there are sidebars featuring the American Institute of Architects NCARB state licensing boards directory of Taliesin fellows a step by step planning checklist and much more Architect?, third edition Roger K. Lewis, 2013-08-09 The new edition of an essential text offers an informative engaging view of the architectural profession from education through practice Since 1985 Architect has been an essential text for aspiring architects offering the best basic guide to the profession available This third edition has been substantially revised and rewritten with new material covering the latest developments in architectural and construction technologies digital methodologies new areas of focus in teaching and practice evolving aesthetic philosophies sustainability and green architecture and alternatives to traditional practice Architect tells the inside story of architectural education and practice it is realistic unvarnished and insightful Chapter 1 asks Why Be an Architect and chapter 2 offers reasons Why Not to Be an Architect After this provocative beginning Architect goes on to explain and critique architectural education covering admission degree and curriculum types and workload as well as such post degree options as internship teaching and work in related fields It offers a detailed discussion of professors and practitioners and the isms andologies most prevalent in teaching and practicing architecture It explains how an architect works and gets work and describes architectural services from initial client contact to construction oversight The new edition also includes a generous selection of drawings and cartoons from the author's Washington Post column Shaping the City offering teachable moments wittily in graphic form The author Roger Lewis has taught practiced and written extensively about architecture for many years In Architect he explains for students professors practitioners and even prospective clients how architects think and work and what they care about as they strive to make the built environment more commodious more beautiful and more sustainable

Philip Johnson and His Mischief Christian Bjorne, The Images Publishing Group, 2014-04-04 In the world of modern art the idea of appropriation or the conscious manipulation of the recognised world of another artist has long been accepted as a legitimate strategy in criticism of the tradition of art authorship challenging the context of viewing contemporary work and the manipulation of omnipresent media images The world of art itself is fair game to be pillaged or mined in the production of new art but there is almost no recognised equivalent aesthetic in architecture Philip Johnson consistently dealt with the concept of appropriation and used it as a design strategy from the very beginning of his illustrious career A singular taste maker Philip Johnson influenced art architecture and design during the second half of the 20th century Philip Johnson and His Mischief Appropriation in Art and Architecture looks at the concept of appropriation and how Johnson's style was influenced first by his mentor Mies van der Rohe and then by post modern ideas and artists This title serves to review Johnson's body of work and show that far from being a weakness his use of appropriation was a major part of his innovative

success **Migrant architects of the NHS** Julian Simpson, 2018-02-26 Migrant Architects draws on 45 oral history interviews and extensive archival research to offer a radical reappraisal of how the National Health Service was made. It tells the story of migrant South Asian doctors who became general practitioners in the NHS, Imperial legacies, professional discrimination, and an exodus of UK trained doctors combined to direct these doctors towards work as GPs in some of the most deprived parts of the UK. In some areas they made up over half of the general practitioner workforce. The NHS was structurally dependent on them and they shaped British society and medicine through their agency. This book is aimed at students and academics with interests in the history of immigration, immigration studies, the history of medicine, South Asian studies, and oral history. It will also be of interest to anyone who wants to know more about how Empire and migration have contributed to making Britain what it is today.
