Performance: Media and technology Philip Auslander, 2003 This collection reflects not only the multidisciplinary nature of current thinking about performance but also the complex and contested nature of the concept itself

The Rush to Policy Peter William House, Roger Roger Don Shull, *Rush to Policy* explores the appropriate role of technical analysis in policy formulation The authors ask when and how the use of sophisticated analytic techniques in decision making benefits the nation They argue that these techniques are too often used in situations where they may not be needed or understood by the decision maker where they may not be to answer the questions raised but are nonetheless required by law House and Shull provide an excellent empirical base for describing the impact of politics on policies policy analysis and policy analysts They examine cost benefit analysis risk analysis and decision analysis and assess their ability to substitute for the current decision making process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W House is the director of policy research and analysis at the National Science Foundation He is the author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including *The Art of Public*

Policy Analysis and with Roger D Shull Regulatory Reform Politics and the Environment and Regulations and Science Management of Research on Demand Roger D Shull is a senior analyst at the Division of Policy Research and Analysis National Science Foundation

Sociology and the Real World Stephen Lyng, David D. Franks, 2002 In this new book Lyng and Franks argue that contemporary sociology has lost its connection to human realities Addressing the conceptual underpinnings of sociological practice they offer ways for sociology to reclaim lost concepts of objectivity reality and truth The authors deconstruct these terms in modern and postmodern contexts yet they look beyond the usual predicaments espoused by these traditions in an effort to rebuild concepts of reality and truth more coherently for contemporary social relations and social problems

Philosophy of Improvisation Susanne Ravn, Simon Høffding, James McGuirk, 2021-05-31 This volume brings together philosophical and interdisciplinary perspectives on improvisation The contributions connect the theoretical dimensions of improvisation with different viewpoints on its practice in the arts and the classroom The chapters address the phenomenon of improvisation in two related ways On the one hand they attend to the lived practices of improvisation both within and without the arts in order to explain the phenomenon They also extend the scope of improvisational practices to include the role of improvisation in habit and in planned action at both individual and collective levels Drawing on recent work done in the philosophy of mind they address questions such as whether improvisation is a single unified phenomenon or whether it entails different senses that can be discerned theoretically and practically Finally they ask after the special kind of improvisational expertise which characterizes musicians dancers and other practitioners an expertise marked by the artist's ability to participate competently in complex situations while deliberately relinquishing control Philosophy of Improvisation will appeal to anyone with a strong interest in improvisation to researchers working in philosophy aesthetics and pedagogy as well as practitioners involved in different kinds of music dance and theater performances

Policymaking Under Adversity Yehezkel Dror, 2017-09-29 This groundbreaking study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's Public Policymaking Reexamined by dealing with current trends As a guide to public policy literature
