The Tangled Bank Stanley Edgar Hyman,1966 The Tangled Bank. Darwin, Marx, Frazer and Freud as Imaginative Writers Stanley Edgar Hyman,1974 **The Tangled Bank** Stanley Edgar Hyman,1966 **The Mid-Victorian**

Generation K. Theodore Hoppen,2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone s first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen s study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation *A Psychology of Difference* Otto Rank,2020-07-21 A leading disciple and confidant of Freud Otto Rank revolutionized the field of psychoanalytic theory in *The Trauma of Birth* 1924 In this book Rank proposed that the child s pre Oedipal relationship to the mother was the prototype of the therapeutic relationship between analyst and patient Although Rank is now widely acknowledged as the most important precursor of humanistic and existential psychotherapy influencing such well known writers as Carl Rogers Rollo May and Ernest Becker Rank s knotty prose has long frustrated readers In this volume of Rank s lectures Robert Kramer has brought together for the first time the innovator s clearest explanations of his most influential theories The lectures were delivered in English to receptive audiences of social workers therapists and clinical psychologists throughout the United States from 1924 to 1938 the year before Rank s untimely death The topics covered include separation and individuation projection and identification love and will relationship therapy and neurosis as a failure in creativity The lectures reveal that Rank much maligned by orthodox analysts invented the modern object relations approach to psychotherapy in the 1920s In his introduction based on private correspondence between Rank Freud and others in the inner circle Robert Kramer tells the full story of why Rank parted ways with Freud The collection of lectures constitutes a readable Rank filled with insights still relevant today for those interested in the humanistic existential or object relational aspects of psychotherapy or in the development of the psychoanalytic movement Victorian Nightshades Elizabeth A. Campbell,2025-03-27 A darkly alluring plant family and the arrival of modernity *Victorian Nightshades* tells the story of how one plant family notorious for centuries in England because

of its frequently psychoactive and poisonous properties rose to social and economic prevalence during the nineteenth century Beginning with bittersweet and belladonna the Old World species associated with evil witchcraft and dangerous women in an era when traditional botanical beliefs not only assigned morality to plants but also gendered them Campbell then moves to the ubiquitous potato and tobacco before concluding with four of the Solanaceae that achieved the widest national favor by the end of the century the ornamental petunia and the edible pepper eggplant and tomato The story of the nightshades exposes the conflicts between science and popular sentiment and between knowledge and received opinion that defined the nineteenth century Campbell compellingly details how advances in medical and botanical knowledge evolutionary theory and the vagaries of human desire transformed the Solanaceae from a plant family plagued by fear and hostility in the British imagination to one of cultural favor and celebration by the turn of the century encapsulating the Victorian era's course to modernity

Victoria's Year Richard L. Stein, 1987 A survey of British literature and culture in the first year of Victoria's reign The discussion ranges over high and low art literature painting architecture science the popular press and private memoirs

A Cultural Citizen of the World S. S. Prawer, 2017-10-23 This book is based on the German editions of Sigmund Freud's works and letters It presents various examples from English and American literatures that suggest several questions Freud asked of literary works in general

Primitive Passions Marianna Torgovnick, 1998-10 In this provocative and illuminating book Marianna Torgovnick explores the psychology of our profound attraction to cultures we call primitive Whether located in Africa the South Pacific or the American Southwest the primitive has become synonymous in the Western imagination with a range of emotions and experiences thought to be lost in modern life reverence for the land and for nature strong communal bonds sexual plenitude and perhaps most intriguing and ecstatic sense of connection to the universe and the life force Torgovnick investigates the numerous ways we have turned toward the primitive out of spiritual hunger for such deeply human experiences a hunger that could once be satisfied within the West's own mystical traditions but that often no longer can be Brilliantly encompassing religion art psychology literature and other aspects of our culture *Primitive Passions* offers new insight into our ideas of spirituality and gender and ultimately into the hidden but vital parts of ourselves

Maelzel's Chess Player Robert Wilcocks, 1994 This is the first study of Freud's texts to incorporate the intellectual findings of Adolf Grünbaum the archival material published by Jeffrey Masson the recently published correspondence between Freud and Wilhelm Fliess and Lewin's profile of long-term cocaine users Wilcocks challenges literary critics who have granted Freud's writings scientific status and claims that the works are no more than the rhetorical deceptions of a talented writer Through a careful examination of the Freud-Fliess correspondence and of Freud's case histories and through a novel comparison of Freud's rhetorical devices with Poe's rhetoric of deception in the essay *Maelzel's Chess Player* Wilcocks reveals that Freud was a talented but disturbed master of deception including self-deception
