

My house is not very big, but it's tidy and cozy. I have a bedroom where I sleep and relax. In my bedroom, there is a bed with a comfortable mattress and pillows. The floor is made of wood, and there is a rug next to the bed. I also have a chair and a desk in my room, where I can study or work on my computer. My wardrobe is next to the desk, and I keep all my clothes in it.

I like to keep my house clean, so I often sweep the floor and dust the furniture. I make my bed every morning, and I always put my clothes away in the wardrobe. Sometimes, I rearrange the furniture in my room to make it look different.

All in all, I really like my house. It's small but comfortable, and I feel happy and relaxed when I'm at home.

Fluency in Reading Zvia Breznitz, 2006-08-15 This is the first book to examine in depth the crucial role of the speed of information processing in the brain in determining reading fluency in both normal and dyslexic readers Part I explains fluency in reading from both traditional and modern perspectives Fluency has historically been viewed as the outcome of other reading related factors and has often been seen as a convenient measure of reading skills This book however argues that fluency has a strong impact on other aspects of reading and plays a central role in the entire reading process Part II deals with the determinants of reading fluency Chief among these is the speed of information processing in the brain Using both behavioral and electrophysiological evidence the book systematically examines the features of processing speed in the various brain systems involved in reading visual orthographic auditory phonological and semantic and shows how speed of processing affects fluency in reading Part III deals with the complex issues of cross modal integration and specifically with the need for effective synchronization of the brain processes involved in reading It puts forward the Synchronization Hypothesis and discusses the role of the Asynchrony Phenomenon as a major factor in dyslexia Finally it summarizes research on manipulating reading rate by means of the Acceleration method providing evidence for a possible intervention aimed at reducing Asynchrony Key features of this outstanding new book include Expanded View of Fluency Reading fluency is seen as both a dependent and an independent Variable Currently available books focus on reading rate solely as the outcome of other factors whereas this volume stresses that it is both an outcome and a cause Information Processing Focus Fluency itself is determined to a large extent by a more general factor namely speed of processing in the brain The book presents wide ranging evidence for individual differences in speed of processing across many subpopulations Brain Synchronization Focus The book posits a new theory arguing that effective reading requires synchronization of the different brain systems visual orthographic auditory phonological and semantic Research Based Interventions Interventions to enhance fluency and thereby
