Annals of Theoretical

Psychology Hans van Rappard, Pieter J. van Strien, Leendert P. Mos, William J. Baker, 2013-11-11 This volume and its companion to be published as Volume 9 in the Annals series had their origin in a visit by the first editor to our Center in 1983 a year prior to our initiating publication of the Annals Some three years later Hans Rappard formally proposed to edit together with the historian of psychology in the Netherlands Pieter van Strien an Annals volume devoted to history and theory Rappard emphasized however that it was to be not just a volume on the relation between history of psychology and theoretical psychology but rather a volume on the relevance of history to theory or psychology in general In other words how and what could doing history contribute to theoretical problems that face contemporary psychology Another four years passed before commitments from the twenty seven contributors were received The plan was to publish a single volume devoted to history and theory however the length of six major papers eighteen commentaries and replies to commentaries necessitated a decision to publish the manuscript in two volumes It was not an easy decision especially as the contributors and editors had achieved an integrity of theme and content that is unusual for edited volumes Moreover in view of the manuscript's long past we felt little inclination to extend its history

Functions and Uses of Disciplinary Histories Loren Graham, Wolf Lepenies, P. Weingart, 1983-07-31 Edward Gibbon's allegation at the beginning of his Essay on the Study of Literature 1764 that the history of empires is that of the miseries of humankind whereas the history of the sciences is that of their splendour and happiness has for a long time been accepted by professional scientists and by historians of science alike For its practitioner the history of a discipline displayed above all the always difficult but finally rewarding approach to a truth which was incorporated in the discipline in its actual form Looking back it was only too easy to distinguish those who erred and heretics in the field from the few forerunners of true science On the one hand the traditional history of science was told as a story of hero and hero worship on the other hand it was paradoxically enough the constant attempt to remind the scientist whom he should better forget It is not surprising at all therefore that the traditional history of science was a field of only minor interest for the practitioner of a distinct scientific discipline or specialty and at the same time a hardly challenging task for the professional historian Nietzsche had already described the historian of science as someone who arrives late after harvest time it is somebody who is only a tolerated guest at the thanksgiving dinner of the scientific community

Historical Social Psychology Kenneth Gergen, Mary Gergen, 2014-01-27 The vast majority of research in social psychology focuses on momentary events an attitude is changed dissonance is reduced a cognition is primed and so on Little attention is paid to the unfolding of events over time to social life as an ongoing process in which events are related in various ways as life unfolds Originally published in 1984 Historical Social Psychology opens a space for theory and research in which temporal process is central Contributors to this broad ranging work provide a rich range of perspectives from the

theoretical to the methodological from micro sequences to the life span and from contemporary history to the long duration. Together these authors set the stage for a major shift in the focus of social psychological inquiry. **Social Theory and Human Reality** Pertti Alasuutari, 2004-09-23 This is a smart and compelling book. Difficult ideas are presented in an accessible manner with plenty of supporting illustrations. Students will enjoy the research material and other supporting material. A definite winner. Professor Jay Gubrium, University of Missouri. This book gets to the heart of what the social sciences really know about the elusive and contradictory object of research: human reality. Drawing on a wide range of international examples and scenarios, *Social Theory and Human Reality* examines key sociological concepts that we use to understand human behaviour such as norms, rules and meanings, language and discourse, ritual and personality and identity construction. Alasuutari clearly and convincingly demonstrates the constant interplay between routines and reflexivity that grounds social order, how the body and our bodily experiences mediate our social reality, that language plays a multi-faceted role as it describes, reflects and constructs human reality. Building on the work started by Berger and Luckmann in *The Social Construction of Reality*, this book is a lucid and contemporary analysis of the premises shared across the social sciences and of the kaleidoscope of human reality. This important book will be welcomed by students and scholars alike in the fields of Cultural Studies, Sociology and Anthropology. **Critical Theories of Psychological Development** John M.

Broughton, 2013-06-29 Something instructive occurred in the process of entitling the present collection. Both editor and publisher sought a simple and succinct rubric for the various pieces of work. But they rapidly and reluctantly reached the consensus that by either intellectual or marketing criteria, the insertion of the adjective psychological to qualify the noun development was a communicative necessity. Much to the chagrin of the developmental psychologist, the term development still connotes to the world at large as well as the general community of publishers, librarians and computer archivists, the modernization of nation states. Inside and outside the university, I find that when asked 'What are you interested in?' I am not at liberty to reply 'The concept of development without being absorbed immediately into a discussion of Third World studies.' The approach of the present volume should be taken as an exhortation to psychologists to take the genealogy of development seriously. The history of the discipline is not so different from the history of the word, and as we shall discover, the concern with developmental progress cannot easily be separated from the urge for dominion. This volume presents a selection from the recent critical scholarship on psychological development. The emphasis is on rethinking the field of developmental psychology at the level of theory. **Psychology from the Standpoint of the Subject** Andrew Boreham, Klaus

Holzkamp, Tod Sloan, 2013-01-23 This book introduces the groundbreaking work of the German critical psychologist Klaus Holzkamp. In contrast to contemporary psychology's worldlessness, the writings present a concept of psychology based on the individual's relations to the world and open up new perspectives on human subjectivity, agency and the conduct of everyday life. *Ecolinguistics Reader* Alwin Fill, Peter Mühlhäusler, 2006-05-01 Thirty years ago a new linguistic paradigm was

created when Einar Haugen for the first time combined language with ecology For Haugen the ecology of language meant the study of the interrelations between languages in the human mind and in the multilingual community Since then a special branch of linguistics named ecolinguistics has developed in which the connection between language and ecology has been established in a variety of ways and by using a multitude of methods and approaches This reader contains important articles from all the different fields of ecolinguistics a volume long overdue for a discipline now recognized as a significant contribution to variety within the subject

The Subjectivity Of Participation M. Nissen,2012-02-17 What is a we a collective and how can we use such communal self knowledge to help people This book is about collectivity participation and subjectivity and about the social theories that may help us understand these matters It also seeks to learn from the innovative practices and ideas of a community of social youth workers in Copenhagen between 1987 and 2003 who developed a pedagogy through creating collectives and mobilizing young people as participants The theoretical and practical traditions are combined in a unique methodology viewing research as a contentious modeling of prototypical practices Through this dialogue it develops an original trans disciplinary critical theory and practice of collective subjectivity for which the ongoing construction and overcoming of common sense or ideology is central It also points to ways of relating discourse with agency and fertilizing insights from interactionism and ideology theories in a cultural historical framework

Handbook of Fundamentals of Modern Vocational Education Felix Rauner,2024-07-25 This book traces the foundations for the new interplay between work technology and education It shows how the guiding idea of co designing the world of work has influenced vocational training planning and research as well as the design of vocational training processes The author delves into the time period from the beginning of the 1980s to the present day in the 21st century and showcases knowledge from numerous national and international projects on vocational education This book serves as a major reference book for researchers practitioners policy makers and other stakeholders alike The basis of the English translation of this book from its German original manuscript was done with the help of artificial intelligence A subsequent human revision of the content was done by the author

Beyond the Archive Jens Brockmeier,2015-08-04 Our longstanding view of memory and remembering is in the midst of a profound transformation This transformation does not only affect our concept of memory or a particular idea of how we remember and forget it is a wider cultural process In order to understand it one must step back and consider what is meant when we say memory Brockmeier s far ranging studies offer such a perspective synthesizing understandings of remembering from the neurosciences humanities social studies and in key works of autobiographical literature and life writing His conclusions force us to radically rethink our very notion of memory as an archive of the past one that suggests the natural existence of a distinctive human capacity or a set of neuronal systems

enabling us to encode store and recall past experiences Now propelled by new scientific insights and digital technologies a new picture is emerging It shows that there are many cultural forms of remembering and forgetting embedded in a broad spectrum of human activities and artifacts This picture is more complex than any notion of memory as storage of the past would allow Indeed it comes with a number of alternatives to the archival memory one of which Brockmeier describes as the narrative approach The narrative approach not only permits us to explore the storied weave of our most personal form of remembering that is the autobiographical it also sheds new light on the interrelations among memory self and culture

The Critique of Psychology Thomas Teo, 2006-07-18 Closely paralleling the history of psychology is the history of its critics their theories and their contributions The Critique of Psychology is the first book to trace this alternate history from a unique perspective that complements the many existing empirical theoretical and social histories of the field Thomas Teo cogently synthesizes major historical and theoretical narratives to describe two centuries of challenges to and the reactions of the mainstream Some of these critiques of content methodology relevance and philosophical worldview have actually influenced and become integrated into the canon others pose moral questions still under debate All are accessibly presented so that readers may judge their value for themselves Kant's critique of rational and empirical psychology at the end of the 18th century The natural scientific critique of philosophical psychology in the 19th century The human scientific critique of natural scientific psychology The Marxist traditions of critique Feminist and postmodern critiques and the contemporary mainstream Postcolonial critiques and the shift from cross cultural to multicultural psychology This is not a book of critique for critique's sake Teo defines the field as a work in progress with goals that are evolving yet constant In emphasizing ethical and political questions faced by psychology as a discipline this visionary book points students academics and practitioners toward new possibilities for their shared future

Cultural-Historical and Critical Psychology Marilyn Fler, Fernando González Rey, Peter E. Jones, 2020-06-11 This book opens up a critical dialogue within and across the theoretical traditions of critical psychology and cultural historical psychology It explores and addresses fundamental issues and problems within both traditions with a view to identifying new avenues for productive discussion and cooperation between these two important movements in contemporary psychology Accordingly the book gathers contributions from a range of internationally respected researchers from both fields who have demonstrated a willingness to look critically and self critically at their theoretical allegiances and trajectories This book provides readers with the opportunity to both appreciate and reflect on fundamental differences of perspective across the cultural historical critical psychology divide and thereby to consider and debate key issues facing the discipline of psychology more generally
