between people from which leadership emerges as a theme We focus on understanding leadership as a practice within which communication research imagination and ethical judgements are continuously improvised So rather than idealising leadership or reducing it to soothing tools and techniques we suggest how leaders might become more politically emotionally and socially savvy This book is written for academics and practitioners with an interest in the everyday challenges of both individual and group practices of formal and informal leaders in different types of organisations and is an ideal resource for executives and students on leadership development programmes We hope this volume will help readers to expand the wisdom found in their own experience and discover for themselves and for others a greater sense of freedom
