**New Kinds of Smart: Teaching Young People to Be Intelligent for Today's World** Bill Lucas, Guy Claxton, 2010-03-16 How people think about education depends on how they understand the notion of intelligence Teaching reflects assumptions about what kinds of mental qualities are worth having and about the extent to which those qualities are fixed or malleable As the idea of intelligence changes so should the aims and methods of education It s time to bring intelligence into the real world In the early 21st century our understanding of the smart mind is changing fast The demands of society are now quite different from those when schools were first designed so the kinds of smart necessary to craft a happy and fulfilling life have changed As life becomes more complex ambiguous and uncertain so a different set of mental and emotional attitudes are needed to thrive Meanwhile researchers in the cognitive affective and learning sciences are developing new models of the smart mind that make it clear that bodies tools and social contacts are as much a part of intelligence as abstract problem solving New Kinds of Smart presents the most important of these changes to practising teachers and educators and invites them to think about their implications for school Each chapter illustrates the research behind one of the emerging new kinds of smart summarises the messages that this research has for practitioners and presents practical examples tools and templates that educators can use to weave this new strand of thinking into their work as teachers and their lives as learners

**The Cult of Smart** Fredrik deBoer, 2020-08-04 Named one of Vulture's Top 10 Best Books of 2020 Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top to bottom reform Everyone agrees that education is the key to creating a more just and equal world and that our schools are broken and failing Proposed reforms variously target incompetent teachers corrupt union practices or outdated curricula but no one acknowledges a scientifically proven fact that we all understand intuitively Academic potential varies between individuals and cannot be dramatically improved In The Cult of Smart educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society which has created and perpetuated an unjust class structure based on intellectual ability Since cognitive talent varies from person to person our education system can never create equal opportunity for all Instead it teaches our children that hierarchy and competition are natural and that human value should be based on intelligence These ideas are counter to everything that the left believes but until they acknowledge the existence of individual cognitive differences progressives remain complicit in keeping the status quo in place This passionate voice driven manifesto demands that we embrace a new goal for education equality of outcomes We must create a world that has a place for everyone not just the academically talented But we'll never achieve this dream until the Cult of Smart is destroyed
