bending in the face of gale forces but never breaking WHERE DOES YOUR TOMORROW SPRING FROM IN OTHER WORDS HOW DID YOU COME UP WITH THE CRAZY WORLD Sometimes I can't remember how the story started by the time I get to the end The Annihilation of Foreverland started with the premise of identity I wanted to write it as a YA book in the science fiction dystopia genre in a way that slowly unfolded as well as questioned who we are and explore our fear of death and what we're willing to do to avoid it Like all of my stories it does have a romantic angle mixed into the action Because it should GIVE YOUR BOOK THE BECHDEL TEST IT HAS TO HAVE AT LEAST TWO NAMED WOMEN IN IT WHO TALK TO EACH OTHER ABOUT SOMETHING BESIDES A MAN I failed because there's only one female in The Annihilation of Foreverland However the young adult sequel Foreverland is Dead passes with flying colors since its mostly female characters that rarely talk about men WHAT SORT OF BODY COUNT ARE WE TALKING HERE The bodies die but not necessarily the characters Chew on that a second DO YOU WANT YOUR TOMORROW TO MAKE IT BIG AS IN JK ROWLING'S BIG WHY OR WHY NOT Believe it or not no Don't get me wrong I'd like to make enough cash to pay off this house and send my kids to college but I'll pass on fame and fortune Anonymity is a blessing YOU CAST YOUR CHARACTERS FOR A MOVIE WHO MAKES IT In The Annihilation of Foreverland I only casted two characters in my head while I was writing it The Director is Jeff Bridges and Mr Jones is Anthony Hopkins It was like watching a movie as I wrote HAVE YOU WRITTEN IN ANY OTHER GENRES BESIDES YA DYSTOPIAN WHAT DREW YOU TO YOU THIS GENRE I've been fascinated by consciousness identity and what this all means since I was young I would read my grandfather's science fiction books with elements of artificial intelligence and alternate realities and wonder what happened when they died I suppose that's why all of my writing deals with the big mysteries of life in one way or another In a way I write for my own exploration in a sort of thought experiment approach pulling apart our identities exploring what makes us who we are If I lost my memories would I still be me If I had my body parts replaced with synthetic replications at what point would I not be me Do I even need a body What am I A few years ago I figured I'd write a romance novel Since all of my books have a romantic element I thought it would be fun Halfway through the novel I found myself thinking more and more about the next project a dystopian idea So 40 000 words in I scrapped the romance novel and got back to what I love Science fiction

How Humankind Created Science Falin Chen,Fang-Tzu Hsu,2020-04-27 The development of science has been an ideological struggle that lasted over three millennia At and after the times of the Babylonian Empire however the pace of scientific evolution was painfully slow This situation changed after Copernicus kick started the Scientific Revolution with his heliocentric theory Newton s law of universal gravitation transformed natural philosophy previously focused on mythology and abstract philosophical thinking into an orderly and rational physical science Einstein s redefinition of space and time revealed a new and central principle of the Universe paving the way for the huge amounts of energy held deep inside physical matter to be released To this day many of the our known physical theories represent an accumulation of changing knowledge over the long course of scientific history But what kind of changes did the scientists see What questions did they address What methods did they use What difficulties did they encounter And what kind of persecution might they have faced on the road to discovering these beautiful sometimes almost mystical ideas This book s purpose is to investigate these questions It leads the reader through the stories behind major scientific advancements and their theories as well as explaining associated examples and hypotheses Over the course of the journey readers will come to understand the way scientists explore nature and how scientific theories are applied to natural phenomena and every day technology
