Social Mobility in Industrial Society Reinhard Bendix, Seymour Martin Lipset, 2024-07-19 **Social Mobility in Industrial Society** Seymour Martin Lipset, 1967 **Social Mobility in Industrial Society**, 2017 In a careful analysis of the existing literature the authors marshal an imposing array of evidence in support of their major argument that social mobility is an integral and continuing aspect of the process of industrialization This classic volume continues to be a basic reference source in the field of occupational mobility Provided by publisher **Twenty Years After** Pierre Weiss, 1979

Social Mobility in Industrial Society Seymour Martin Lipset (Sociologist, United States), Reinhard Bendix, 1959

Historical Research on Social Mobility Hartmut Kaelble, 2025-08-01 First published in English in 1981 Historical Research on Social Mobility treats a central area of social history the history of social mobility It provides a unique guide to the wide range of research in this area that is carried out by many specialists of varying disciplines within social science Concentrating on Western Europe and the USA during the nineteenth and twentieth centuries the book considers four topics changes in the occupational and social opportunities of the working class the inequality of educational opportunity shifts in the recruitment of business elites and changes in the social origins of the political elites Illustrating concrete results of research into the history of social mobility the volume also points to both the advances and shortcomings in this relatively new area Incorporating an extensive bibliography the book provides an invaluable stimulus for further reading and investigation

Revolutionary Politics and the Cuban Working Class Maurice Zeitlin, 2015-12-08 In 1962 the author got into Cuba and interviewed workers on the subject of the Revolution Professor Zeitlin examines the effects of the revolution and the influence of such factors as age race and skill on the workers attitudes Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Latin American University Students** Arthur Liebman, Kenneth N. Walker, Myron Glazer, 1972

Why does the interaction between Latin American students and the Latin American university typically an archaic socially insulated institution regularly produce a significant number of students opposed to their governments and to the existing social structure To answer this question the authors of this comparative study of student political attitudes and behavior questioned students at eleven universities in six culturally similar but economically and governmentally different Latin American countries Colombia Mexico Panama Paraguay Puerto Rico and Uruguay **Multidimensional Aspects of Occupational Segregation** Keiko Nakao, 2024-04-29 One of the strengths of this book is that it expresses occupational segregation from multidimensional viewpoints using correspondence analysis Through a quantitative approach the book

examines occupational segregation by education and gender in response to industrial transformation in Japan and other countries The transformation of industrial structure such as post industrialization demands a reconsideration of traditional perspectives in sociology especially in social stratification In other words it is a shift from the attribute to the achievement principle Higher technological innovations will create higher levels of industries and those industries will require jobs that need greater human capital In short the meritocracy will be promoted Meritocracy is certainly considered persuasive In fact previous researchers have looked primarily at a person s occupation as a measure of social status In Japan jobs are normally acquired after completing education thus one s educational achievement plays an important role Especially in recent years however education alone has not been enough to explain social status This book therefore focuses on occupational segregation by gender in addition to education in post industrial society Can occupational segregation by gender be weakened in the highly educated group Is this a universal story in modern society Because post industrialization is part of the larger story of modernization international perspectives are needed to examine the linkage between education and gender occupational segregation This book explores occupational segregation by gender in response to industrial transformation in Japan and other countries National Union Catalog ,1956 Includes entries for maps and atlases *Social Mobility Into Post-industrial Society* Krzysztof Zagórski (sociologia),1983 The Middle Class in World Society Christian Suter,S. Madheswaran,B.P. Vani,2020-05-21 This volume delves into the study of the world s emerging middle class With essays on Europe the United States Africa Latin America and Asia the book studies recent trends and developments in middle class evolution at the global regional national and local levels It reconsiders the conceptualization of the middle class with a focus on the diversity of middle class formation in different regions and zones of world society It also explores middle class lifestyles and everyday experiences including experiences of social mobility feelings of insecurity and anxiety and even middle class engagement with social activism Drawing on extensive fieldwork and in depth interviews the book provides a sophisticated analysis of this new and rapidly expanding socioeconomic group and puts forth some provocative ideas for intellectual and policy debates It will be of importance to students and researchers of sociology economics development studies political studies Latin American studies and Asian Studies *Social Mobility in Kerala* Filippo Osella,Caroline Osella,2000-12-20 The Izhavas are an ex untouchable community in the southern Indian state of Kerala Politically and economically weak stigmatised as toddy tappers and devil dancers and considered unapproachable by clean caste Hindus a century ago Izhavas were associated with other manual labouring untouchable castes In recent decades they have sought to improve their position by accumulating economic symbolic and cultural capital through employment religion politics migration marriage education and have tried to assert their right to mobility often in the face of opposition from their high status Christian and Nayar neighbours This study examines how Izhavas through repudiation of their nineteenth century identity and search for mobility have come into complex relationships with modernity colonialism and globalisation Filippo

Osella and Caroline Osella highlight the complexities and contradictions of modern identity both locally and globally. The authors' approach builds upon and goes beyond a South Asian focus, showing how the Izhavas represent the rise of formerly stigmatised groups who remain at the same time trapped by stereotype and material disadvantage. Absolute mobility, they argue, has not led to relative mobility within a society which remains stratified and prone to new forms of social exclusion.

Social Stratification in an Aging Society with Low Fertility Sawako Shirahase, 2022-08-31. This edited book empirically discusses stratification in contemporary Japanese society. It is unique for its examination of social inequality in relation to declining fertility and an aging population. Japan is the most aged society in the world according to the Statistics Bureau of Japan; people who are aged 65 and above comprised 29.1% of the country's total population in 2021. Meanwhile, the fertility rate has continuously declined since the mid-1970s. Japan experienced a dramatic change in its demographic structure in a short period of time. Such fast change could be a major factor that generated social stratification. In her industrialization, Japan was thought to share a pattern of social stratification similar to that of developed European and North American countries but with a low degree of socio-economic inequality and a high degree of homogeneity. There is no clear support for this description of Japan, although the country does share a pattern and degree of social stratification similar to that observed in Europe and North America. The social stratification theory has been developed in close relationship to the labor market; however, it is necessary to further examine the social stratification of very aged societies in which a substantial number of the population, namely retired persons, no longer have any ties to the labor market. In this book, the contributors explore the pattern of social stratification at three life stages: young, middle-aged, and elderly. Included are discussions of various aspects of stratification such as education, work, wealth, marriage, family, gender, generation, and social attitudes.

Destiny Makers of Indian Industry Vidula Jakatdar, 1990. **Class and the Communist Party of China, 1921-1978** Marc Blecher, David S. G. Goodman, Yingjie Guo, Jean-Louis Rocca, Tony Saich, 2022-02-24. Examining the interaction between the Communist Party of China (CCP) and specific social categories including peasants, workers, the middle classes, and the dominant class, with a focus on class and class discourse, this volume analyses the CCP's impact on social change in China between 1921 and 1978. By exploring the CCP's evolving discourse of class, this book demonstrates that while class has retained its centrality, its meaning has been re-articulated from an ideological-political tool to a less meaningful signifier, though always used instrumentally. By examining the impact of the CCP's policies and discourse surrounding class, it also reveals how its own policies since 1921 have shaped the CCP's current (2021) perspectives on class and stratification. This volume, through an analysis of economic, political, and cultural inequalities in Chinese society even after 1949, also reveals the emergence of a diverse and often overlooked middle class in Chinese society during the 1950s. Delivering a detailed analysis of how the CCP has developed its practical approaches to class and mobilization, this study will be of interest to students and scholars of Chinese politics, Chinese history, Asian politics, and Asian studies. **Social Structure and Social Process** Peter

Orleans, Sonya Orleans, 1969 **W. O. Atwater Memorial Lecture**, 1968 Workers at War Joshua H. Howard, 2004-09-29 This book focuses on the lives struggles and contrasting perspectives of the 60 000 workers military administrators and technical staff employed in the largest most strategic industry of the Nationalist government the armaments industry based in the wartime capital Chongqing The author argues that China s arsenal workers participated in three interlocked conflicts between 1937 and 1953 a war of national liberation a civil war and a class war The work adds to the scholarship on the Chinese revolution which has previously focused primarily on rural China showing how workers alienation from the military officers directing the arsenals eroded the legitimacy of the Nationalist regime and how the Communists mobilized working class support in Chongqing Moreover in emphasizing the urban working class and nationalist components of the 1949 revolution the author demonstrates the multiple sources of workers identities and thus challenges previous studies that have exclusively stressed workers particularistic or regional identities **Nineteenth-Century Society** E. A. Wrigley, 1972-09-14 Examines the difficulties and the opportunities which the accumulation of statistical information offers for studying nineteenth century society in depth
