**Encyclopedia of Law and Society** David S. Clark, 2007-07-10 This work will be very valuable for academic and public libraries supporting prelaw law social and cultural studies Summing Up Highly recommended Upper level undergraduates through professionals practitioners general readers CHOICE There are two aspects of scholarship about the legal systems of our day that are especially salient one being for the first time there is a fair amount of genuine research on legal systems and two that this research is increasingly global As soon as you cross a jurisdictional line even if it separates countries that are very similar you enter a different legal system It cannot be assumed that any particular rule doctrine or practice is the same in any two jurisdictions regardless of how close these jurisdictions are in terms of history and tradition The Encyclopedia of Law and Society is the largest comprehensive and international treatment of the law and society field With an Advisory Board of 62 members from 20 countries and six continents the three volumes of this state of the art resource represent interdisciplinary perspectives on law from sociology criminology cultural anthropology political science social psychology and economics By globalizing the Encyclopedia's coverage American and international law and society will be better understood within its historical and comparative context Key Features Includes more than 700 biographical entries that are historical comparative topical thematic and methodological Presents the rich diversity of European Latin American Asian African and Australasian developments for the first time in one place to reveal the truly holistic interdisciplinary virtues of law and society Examines how and why legal systems grow and change how and why they respond or fail to respond to their environment how and why they impact the life of society and how and why the life of society impacts in turn these legal systems With borders more porous than ever before this Encyclopedia reflects the paradoxical reality of modern life including legal life This valuable resource aims to present research along with the theories on which it is grounded fairly and comprehensively and is a must have for all academic libraries **Society in Time and Space** Robert A.

Dodgshon, 1998-08-13 Table of Contents *Seeking Spatial Justice* Edward W. Soja, 2013-11-30 In 1996 the Los Angeles Bus Riders Union a grassroots advocacy organization won a historic legal victory against the city's Metropolitan Transit Authority The resulting consent decree forced the MTA for a period of ten years to essentially reorient the mass transit system to better serve the city's poorest residents A stunning reversal of conventional governance and planning in urban America which almost always favors wealthier residents this decision is also for renowned urban theorist Edward W Soja a concrete example of spatial justice in action In *Seeking Spatial Justice* Soja argues that justice has a geography and that the equitable distribution of resources services and access is a basic human right Building on current concerns in critical geography and the new spatial consciousness Soja interweaves theory and practice offering new ways of understanding and changing the unjust geographies in which we live After tracing the evolution of spatial justice and the closely related notion of the right to the city in the influential work of Henri Lefebvre David Harvey and others he demonstrates how these ideas are now being

applied through a series of case studies in Los Angeles the city at the forefront of this movement Soja focuses on such innovative labor community coalitions as Justice for Janitors the Los Angeles Alliance for a New Economy and the Right to the City Alliance on struggles for rent control and environmental justice and on the role that faculty and students in the UCLA Department of Urban Planning have played in both developing the theory of spatial justice and putting it into practice Effectively locating spatial justice as a theoretical concept a mode of empirical analysis and a strategy for social and political action this book makes a significant contribution to the contemporary debates about justice space and the city *History, Space and Place* Susanne Rau, 2019-03-05 Spaces too have a history And history always takes place in spaces But what do historians mean when they use the word spaces And how can spaces be historically investigated Susanne Rau provides a survey of the history of Western concepts of space opens up interdisciplinary approaches to the phenomenon of space in fields ranging from physics and geography to philosophy and sociology and explains how historical spatial analysis can be methodologically and conceptually conceived and carried out in practice The case studies presented in the book come from the fields of urban history the history of trade and global history including the history of cartography but its analysis is equally relevant to other fields of inquiry This book offers the first comprehensive introduction to the theory and methodology of historical spatial analysis Supported by Open Access funds of the University of Erfurt *Resilience and Regional Development* Gabriela C. Pascariu, Ramona Țigănașu, Karima Kourtit, Peter Nijkamp, 2023-08-14 Interdisciplinary in its approach with expert contributors from diverse backgrounds Resilience and Regional Development brings to light the significance of multiple dimensions of resilience and its implications for the economy Bookseller and the Stationery Trades' Journal , 1981 **Urbanization and Production of Space** Chao Ye, Liang Zhuang, 2023-05-18 This book studies China's urbanization with the theory of production of space The authors redefine the production of space and build a new theoretical framework for understanding the evolving relations between urbanization and spatial production Since the reform and opening up especially in the last twenty years the logic of spatial production has dominated China's urbanization The authors choose the most representative cases such as the Yangtze River Delta Urban Agglomeration Jiangsu Province National High tech Industrial Development Zone New Urban District State Level New Area University Town and some villages to conduct a series of empirical studies on production of space at the macro meso and micro scales Through an in depth analysis of the interaction between social spaces and urbanization influenced by power capital and class the book reveals that the essence of China's urbanization is dominated by the logic of spatial production The authors finally propose that an important shift toward humanism should be made in the future development of China's new type urbanization emphasizing more even and adequate development between different regions and between urban and rural areas which also provides new ideas for the theory and practice of urbanization worldwide This book can be read and referenced by researchers in the fields of urban and regional studies geography sociology urban and rural planning management etc It can

also be used as a teaching reference book for teachers researchers and students of scientific research institutions in related fields
