Social Control Of Religious Zeal A Study:

The Social Control of Religious Zeal Jon Miller, 1994 How has the organization of the Christian missionary movement managed to persist for almost two centuries Jon Miller covers the activities of the Evangelical Missionary Society of Basel Switzerland from 1828 to 1918 as it struggled to bring its Pietist religious beliefs to the people of the Gold Coast of West Africa The mission gave different social classes an opportunity to interact in a way that would have been unlikely in Europe Many of the missionaries became socially mobile over the generations through their evangelical work In matters of governance Pietist beliefs called for concentrated power at the center That discipline channeled the zeal of the missionaries but it alienated ordinary members and suppressed their initiative while at the same time allowing creativity among eccentric nonconformists Miller interprets these contradictions explores their consequences at home and abroad and explains how the mission persisted despite the personal pain its members experienced The mission remains active and influential in Africa to this day This study of the passage of an organization through time will interest organizational sociologists sociologists of religion and students of social theory and social change

Introduction to the Sociology of Missions Robert L. Montgomery, 1999-11-30 While much work has been done to apply anthropological insights to the study of missions the sociological perspective has been generally neglected by missiologists This volume defines the sociology of missions as a discrete subdiscipline within the sociology of religion and provides a working set of conceptual resources for those involved in mission work to use in furthering their understanding of their task The author reviews the major areas of sociology that are most relevant to missions and presents his findings as a basis for discussion and a stimulus to further exploration of relevant sociological concepts and theories One of his main goals is to increase dialogue between missiologists and sociologists of religion by providing the former with a sociological perspective and the latter with a deeper understanding of the missionary enterprise

From Mission to Modernity Paul Sedra, 2011-03-30 In this pioneering account of Egyptian educational history Paul Sedra describes how the Egyptian state under Muhammad Ali Pasha sought to forge a new relationship with children during the nineteenth century Through the introduction of modern forms of education brought to Egypt by evangelical missions the state aimed to ensure children s loyal service to the state whether through conscription or forced labour However these schemes of educational reform most prominently Joseph Lancaster s monitorial system led to unforeseen consequences as students in Egypt s new modern schools resisted efforts to control their behaviour in creative and complex ways and these acts of resistance themselves led to new forms of political identity Tracing the development of a distinctly Egyptian modernity *From Mission to Modernity* is indispensable for all those interested in Egyptian history and the history of modern education and reform
