Social Function Of Art:

Concerning Stephen Willats and the Social Function of Art Sharon Irish, 2020-12-10 This book on Stephen Willats pulls together key strands of his practice and threads them through histories of British cybernetics experimental art and urban design For Willats a cluster of concepts about control and feedback within living and machine systems cybernetics offered a new means to make art relevant For decades Willats has built relationships through art with people in tower blocks underground clubs middle class enclaves and warehouses on the Isle of Dogs to investigate their current conditions and future possibilities Sharon Irish's study demonstrates the power of Willats's multi media art to catalyze communication among participants and to upend ideas about audience and art Here Irish argues that it is artists like Willats who are now the instigators of social transformation

Creation and the Function of Art Jason Tuckwell, 2017-11-30 Returning to the Greek understanding of art to rethink its capacities *Creation and the Function of Art* focuses on the relationship between techné and physis nature Moving away from the theoretical Platonism which dominates contemporary understandings of art this book instead reinvigorates Aristotelian causation Beginning with the Greek topos and turning to insights from philosophy pure mathematics psychoanalysis and biology Jason Tuckwell re-problematizes techné in functional terms This book examines the deviations at play within logical forms the subject and upon physis to better situate the role of the function in poiesis art In so doing Tuckwell argues that art concerns a genuinely creative labour that cannot be resolved via an ontological or epistemological problem but which instead constitutes an encounter with the problematic As such techné is shown to be a property of the living of intelligence coupled to action that not only enacts poiesis or art but indicates a broader role for creative deviation in nature

Mapeh in Action I' 2008 Ed. , **Art and Revolution in Latin America, 1910-1990** David Craven, 2006-01-01 In this uniquely wide ranging book David Craven investigates the extraordinary impact of three Latin American revolutions on the visual arts and on cultural policy The three great upheavals in Mexico 1910-40 in Cuba 1959-89 and in Nicaragua 1979-90 were defining moments in twentieth century life in the Americas Craven discusses the structural logic of each movement's artistic project by whom how and for whom artworks were produced and assesses their legacies In each case he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders The book not only examines specific artworks originating from each revolution's attempt to deal with the challenge of socializing the arts but also the engagement of the working classes in Mexico Cuba and Nicaragua with a tradition of the fine arts made newly accessible through social transformation Craven considers how each revolution dealt with the pressing problem of creating a dialogical art one that reconfigures the existing artistic resource rather than one that just reproduces a populist art to keep things as they were In addition the author charts the impact on the revolutionary processes of theories of art and education articulated by such thinkers as John Dewey and Paulo Freire The book provides a

fascinating new view of the Latin American revolutionaries from artists to political leaders who defined art as a fundamental force for the transformation of society and who bequeathed new ways of thinking about the relations among art ideology and class within a revolutionary process

What Is Art For? Ellen Dissanayake, 2015-09-01 Every human society displays some form of behavior that can be called art and in most societies other than our own the arts play an integral part in social life Those who wish to understand art in its broadest sense as a universal human endowment need to go beyond modern Western elitist notions that disregard other cultures and ignore the human species four million year evolutionary history This book offers a new and unprecedentedly comprehensive theory of the evolutionary significance of art Art meaning not only visual art but music poetic language dance and performance is for the first time regarded from a biobehavioral or ethical viewpoint It is shown to be a biological necessity in human existence and fundamental characteristic of the human species In this provocative study Ellen Dissanayake examines art along with play and ritual as human behaviors that make special and proposes that making special is an inherited tendency as intrinsic to the human species as speech and toolmaking She claims that the arts evolved as means of making socially important activities memorable and pleasurable and thus have been essential to human survival Avoiding simplism and reductionism this original synthetic approach permits a fresh look at old questions about the origins nature purpose and value of art It crosses disciplinary boundaries and integrates a number of diverse fields human ethology evolutionary biology the psychology and philosophy of art physical and cultural anthropology primitive and prehistoric art Western cultural history and children's art The final chapter From Tradition to Aestheticism explores some of the ways in which modern Western society has diverged from other societies particularly the type of society in which human beings evolved and considers the effects of the aberrance on our art and our attitudes toward art This book is addressed to readers who have a concerned interest in the arts or in human nature and the state of modern society

Learning to See Alan Gowans, 1981 Learning to See starts on the assumption that popular commercial arts are a different kind of activity from avant garde arts today but that they represent the same kind of activity that we identify as arts historically It proceeds then to investigate how popular commercial arts carry out the social functions of historic arts And it claims that once we can thereby understand how historic arts worked in and for society art history becomes a significant new tool for objective historical research as never before
