Social and Personality Development Kevin B. MacDonald, 2012-12-06 This volume is an attempt to integrate the theory and data of social and personality development within a modern evolutionary framework The various chapters are not meant to be read in isolation from one another but rather are intended to form an integrated whole There is thus a great deal of cross referencing between chapters and to some extent they all stand or fall together This also suggests that the accuracy or usefulness of a particular chapter cannot be judged until the book is comprehended as a whole Chapter 1 deals with the theoretical foundations of this enterprise and the focus is on the compatibility of mainstream approaches within the field to a modern evolutionary approach Chapters 2 4 concern what I view to be the fundamental proximal mechanisms underlying social and personality development Chapter 2 on temperament and personality development is particularly central to the rest of the volume because these processes are repeatedly invoked as explanatory concepts at later points in the volume

Social Learning Thomas R. Zentall, B. G. Galef, Jr., 2013-12-16 First published in 1988 During the past decade there has been a marked increase in the number of North American and European laboratories engaged in the study of social learning As a consequence evidence is rapidly accumulating that in animals as in humans social interaction plays an important role in facilitating development of adaptive patterns of behavior Experimenters are isolated both by the phenomena they study and by the species with which they work The process of creating a coherent field out of the diversity of current social learning research is likely to be both long and difficult It the authors hope that the present volume may prove a useful first step in bringing order to a diverse field

Handbook of Adult Development and Learning Carol Hoare, 2006-03-30 Adult development and learning have always existed as two separate fields of study with development falling under psychology and learning under education Recent advances in theory research and practice however have made it clear that an important reciprocal relationship exists between them advances in development frequently lead to learning and conversely learning quite often fuels development The synchronicity between development and learning is responsible for positive changes in many capacities including insight intelligence reflective and meta cognition personality expression interpersonal competence and self efficacy This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning The Handbook of Adult Development and Learning is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline the latest research at the intersection of these fields It examines six major aspects of their intersection foundations key areas of integration the self system higher reaches of development and learning essential contexts and specific applications An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research This handbook is a must read for all who promote optimal aging It will be an invaluable reference for scholars in development and education as well as rich resource for policy makers and practitioners such as corporate executives and human resource personnel

Introduction to Behavioral Science in Medicine F.R. Hine, R.C. Carson, G.L. Maddox, R.J. Jr. Thompson, R.B. Williams, 2012-12-06 This book is the product of many years experience teaching behavioral science in a way that demonstrates its relevance to clinical medicine We have been guided by the reactions and evaluations of many first year medical students The result is a conceptual framework different from those that we and others had tried before Because the clinical relevance of knowledge about human behavior is less apparent to many first year students than that of the other traditional pre clinical courses books and courses organized as brief introductions to psychology sociology and behavioral neurology have often been poorly

received Various medical schools and texts have explored ways to overcome this difficulty One text organizes the presentation around very practical problems which are of unmistakable interest to the future physician the therapeutic relationship death and dying sexuality and pain to give a few examples Another emphasizes stages of development periods of the human life cycle as its organizing principle Both of these approaches have merit and have been used successfully in various schools They seem to us however to have a potentially serious shortcoming They focus student attention too much on the more immediately intriguing issues of specific clinical problems or on the more easily recognized age specific behavioral issues In the limited time available the teaching of general principles of human behavioral functioning may then be neglected

Contemporary Perspectives on Social Learning in Early Childhood Education Olivia Saracho,Bernard Spodek,2007-06-01 Social epistemology is a broad set of approaches to the study of knowledge and to gain information about the social dimensions This intellectual movement of wide cross disciplinary sources reconstructs the problems of epistemology when knowledge is considered to be intrinsically social In the first chapter Social Epistemology and Social Learning Olivia Saracho and Bernard Spodek discuss the social and historical contexts in which different forms of knowledge are formulated based on the perspective of social epistemology They also discuss the emergence of social epistemology which guides researchers to

investigate social phenomena in laboratory and field settings Social factors external to the appropriate business of science have a major impact in the social studies researchers historical case studies Thus social studies researchers may be considered social epistemologists because a they focus on knowledge of social influences and b they infer epistemologically significant conclusions from their sociological or anthropological research In addition analyses indicate that studies of scientific paradigms are basically a struggle for political power rather than reflecting reliable epistemic merit Social studies researchers focus on knowledge of social influences on knowledge which is analogous to the knowledge of the social epistemologists They also use their sociological or anthropological research to infer epistemologically significant conclusions
