Behavioral Approaches to Crime and Delinquency Edward K. Morris, Curtis J. Braukmann, 2012-12-06 The systematic application of behavioral psychology to crime and delinquency was begun only 20

years ago yet it has already contributed significantly to our practical knowledge about prevention and correction and to our general understanding of a pressing social problem. In this handbook we review and evaluate what has been accomplished to date as well as what is currently at the leading edge of the field. We do so in order to present a clear, comprehensive and systematic view of the field and to promote and encourage still more effective action and social policy reform in the future. The chapters in this text have been written by professionals who were among the original innovators in applying behavioral psychology to crime and delinquency and who continue to make critical contributions to the field's progress and by a new generation of energetic young professionals who are taking the field in important and innovative directions. The contributors have attempted to review and evaluate their areas with critical dispassion to provide thorough but not overly specialized discussion of their material and to draw implications for how research application and social policy might be improved in the future. For our part as editors we have tried to foster integration across the chapters and to provide background and conceptual material of our own.

Cognitive-behavioural Social Work in Practice Katy Cigno, Diana Bourn, 2017-07-05

Cognitive Behavioural Social Work in Practice appears at an interesting time for social work and social services. More than ever practitioners are required to provide evidence for the effectiveness of what they do while the rights of service users to ethically competent practice in which they are partners is high on the agenda. Drawing on a wide area of research as well as the practice experience of its 18 contributors it covers a broad range of cognitive behavioural intervention with different client groups in a variety of settings including child care, family work, probation and offending behaviour, mental health, disability and issues concerning older people. The first chapter sets out lucidly the theoretical and research basis for cognitive behavioural practice and is rich in case examples. Each subsequent chapter adopts a case study approach to its subject either by providing a single case study or by the detailed exploration of an area of practice combined with case examples. The volume is unique in not only bringing together practitioners and academics but in presenting the work of the academic reflective practitioner. It is thus an accessible, informative guide for professionals, students and educators who with all their working pressures and constraints strive to provide help based on best evidence.
