The Social Geography of Medicine and Health (RLE Social & Cultural Geography) John Eyles, Kevin Woods, 2014-01-10 This book originally published in 1983 drawing material from Europe the USA the Soviet Union and the Developing World provides a comprehensive review of the key issues in medical geography It sets the central problems of medical geography in a broad social context as well as in a spatial one and analyses changing conceptions of health and illness in detail It also explores the pathological relationship between people and their environment and illustrates that social phenomena form spatial patterns which provide a good starting point for the examination of the relationship between medicine health and society Evolutionary Theory in the Social Sciences: Early foundations and later contributions William M. Dugger, Howard J. Sherman, 2003 **A Relational Theory of World Politics** Yaqing Qin, 2018-04-05 Drawing on Chinese cultural and philosophical traditions this book offers a ground breaking reinterpretation of world politics from Yaqing Qin one of China's leading scholars of international relations Qin has pioneered the study of constructivism in China and developed a variant of this approach arguing that culture defined in terms of background knowledge nurtures social theory and enables theoretical innovation Building upon this argument this book presents the concept of relationality shifting the focus from individual actors to the relations amongst actors This ontology of relations examines the unfolding processes whereby relations create the identities of actors and provide motivations for their actions Appealing to scholars of international relations theory social theory and Chinese political thought this exciting new concept will be of particular interest to those who are seeking to bridge Eastern and Western approaches for a truly global international relations project

Basic Theoretical Research on Marxist Philosophy Geng Yang, 2021-06-18 This book addresses pioneering views and hot topics in contemporary Marxist philosophy reflecting the latest advances and important achievements made over the past 30 years in China Besides summarizes and reflects past and present advances in Marxist philosophy this book also outlines a path for its future development in China Presenting a comprehensive exploration of the most fundamental and significant theoretical issues in the field of contemporary Chinese Marxist philosophy based on the latest research it lays the foundation for Chinese philosophy in the new century making it of great significance for promoting the study of contemporary Chinese philosophy *Post-Human Futures* Mark Carrigan, Douglas V. Porpora, 2021-04-12 This volume engages with post humanist and transhumanist approaches to present an original exploration of the question of how humankind will fare in the face of

artificial intelligence With emerging technologies now widely assumed to be calling into question assumptions about human beings and their place within the world and computational innovations of machine learning leading some to claim we are coming ever closer to the long sought artificial general intelligence it defends humanity with the argument that technological advances introduced artificially into some humans do not annul their fundamental human qualities Against the challenge presented by the possibility that advanced artificial intelligence will be fully capable of original thinking creative self development and moral judgement and therefore have claims to legal rights the authors advance a form of essentialism that justifies providing a decent minimum life for all persons As such while the future of the human is in question the authors show how dispensing with either the category itself or the underlying reality is a less plausible solution than is often assumed

Nature: The nature of human nature David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

Human Behavior, Psychology, and Social Interaction in the Digital Era Mesquita, Anabela, Tsai, Chia-Wen, 2015-06-29 The advancement of new technologies has greatly increased the impact of information systems on daily human life As technology continues to rapidly progress human computer interaction is quickly becoming a topic of interest Human Behavior Psychology and Social Interaction in the Digital Era combines best practices and empirical research on social networking and other related technologies Emphasizing creative and innovative implementation across various disciplines this publication is a critical reference source for researchers educators students IT managers and government healthcare agencies concerned with the latest research in the fields of information systems and networks mobile technology cybercrime and multitasking

Human Characteristics Preben Bertelsen, Henrik Høgh-Olesen, Jan Tønnesvang, 2009-01-23 Every once in a while we have to reconsider the perennial questions concerning human nature What are the special human behaviours social practices and psychological structures that make us particularly human The field of evolution psychology

and cognitive science is the most expanding inter disciplinary area of this field for the time being uniting different sciences under the same evolutionary paradigm and keeping them occupied by the same eternal questions stated above Relevant data and theoretical considerations are piling up but an overview is needed To facilitate this a large inter disciplinary conference entitled Human Mind Human Kind was held at Aarhus University Denmark The studies fall into three well defined sections 1 Evolution and Cognition Comparative and Developmental Perspectives 2 Human Sociality Morality and Religiosity 3 Human Sexuality and Mating Strategies Specifying the differences between our own species and the rest of the animal world always provokes debate But these demarcations simply have to be drawn once and again They focus attention and stimulate research exactly because they provoke and challenge other researchers to take up the glove and prove us wrong

The Self and Social Relations Matthew Whittingham, 2018-06-29 This book is concerned with the human individual and her relationship with the communities of which she is a member It argues against the traditional atomistic view that individuals are essentially independent of the social relations into which they enter and instead argues for the holistic view that we are essentially social beings who cannot exist apart from normative communities Matthew Whittingham engages in a sustained exploration and criticism of the classic Western picture of epistemology He argues instead that communities ground the possibility of our forming a conception of the world and ourselves that those social relations open up a range of affective responses and forms of action that would otherwise be impossible they enable us to know and reason about the world and they make possible the daily struggles for freedom and self realization that are familiar to us all and find their most powerful expression in major social movements
