also believe that in a multilingual world where learners may belong to more than one speech community their main goal is not to become a native speaker of English but to use this language as a tool for interaction among many other languages and cultures *The SAGE Handbook of Sociolinguistics* Ruth Wodak, Barbara Johnstone, Paul E Kerswill, 2010-09-23 A treasure trove for sociolinguistic researchers and students alike Edited by three leading sociolinguists the 39 chapters cover a wealth of valuable material And the cast list reads like a veritable Who's Who of sociolinguistics with a refreshing number of younger scholars included along with more familiar well established names This is a book that I will reach for often both for research and teaching purposes I will recommend it to my postgraduate students and many of the chapters will provide excellent material for discussion in our advanced undergraduate sociolinguistics course Janet Holmes Discourse Studies The best the most complete and the most integrated handbook of sociolinguistics of the past decade Joshua A Fishman NYU and Stanford University This Handbook answers a long standing need for an up to date comprehensive international in depth critical survey of the history trajectory data results and key figures involved in sociolinguistics It consists of six inter linked sections The History of Sociolinguistics Sociolinguistics and Social Theory Language Variation and Change Interaction Multilingualism and Contact Applications The result is a work of unprecedented coverage and insight It is all here from the foundational contributions to the field to the impact of new media new technologies of communication globalization trans border fluidities and agendas of research The book will quickly be recognized as a benchmark in the field It will provide a basis for reckoning its origins and pathways of development as well as an authoritative account of the central debates and research issues of today

Handbook of Teaching and Learning Persian as a Second Language Hooman Saedi, 2025-09-26. This collection explores relevant pedagogical and sociolinguistic topics in the teaching and learning of Persian as a foreign and second language. Owing to the dearth of research in many areas pertaining to the teaching and learning of Persian, this handbook provides empirically supported insights into various aspects of these areas. While the literature on teaching and learning Persian is growing, the field lacks a cohesive collection on Persian as a foreign second language. The book addresses issues pertaining to the standardization and validation of teaching and assessment methods which remain underexplored in the contexts of teaching and learning Persian. It also covers the teaching of Persian pragmatics, the use of corpora, as well as a range of different areas within linguistics including phonetics, prosody, and historical linguistics. This comprehensive collection contributes substantially to the scientific study of many aspects of teaching and learning Persian which have been neglected for decades. A must-have text in Persian language pedagogy and Persian sociolinguistics, it is an essential book for those in teaching and learning in Persian language programs worldwide.

This book focuses on perspectives from and on the global south, providing fresh data and analyses on languages in African, Caribbean, Middle Eastern, and Asian tourism contexts. It provides a critical perspective on tourism in postcolonial and neocolonial settings explored through in-depth case studies. The volume offers a multifaceted view on how language commodifies and is commodified in tourism settings and considers language practices and discourse as a way of constructing identities, boundaries, and places. It also reflects on academic practice and economic dynamics in a field that is characterised by social inequalities and injustice, and tourism as the world's largest industry enacting dynamic communicative, social, and cultural transformations. The book will appeal to both undergraduate and postgraduate students of tourism studies, linguistics, literature, cultural history, and anthropology, as well as researchers and professionals in these fields.

Language in Use Andrea E. Tyler, Mari Takada, Yiyoun Kim, Diana Marinova, 2005-03-23. *Language in Use* creatively brings together for the first time perspectives from cognitive linguistics, language acquisition, discourse analysis, and linguistic anthropology. The physical distance between nations and continents and the boundaries between different theories and subfields within linguistics have made it difficult to recognize the possibilities of how research from each of these fields can challenge, inform, and enrich the others. This book aims to make those boundaries more transparent and encourages more collaborative research. The unifying theme is studying how language is used in context and explores how language is shaped by the nature of human cognition and social cultural activity. *Language in Use* examines language processing and first language learning and illuminates the insights that discourse and usage-based models provide in issues of second language learning. Using a diverse array of methodologies, it examines how speakers employ various discourse-level resources to structure interaction and create meaning. Finally, it addresses issues of language use and creation of social identity. Unique in approach and wide-ranging in application, the contributions in this volume place emphasis on the analysis of actual discourse and the insights that analyses of such data bring to language learning as well as how language shapes and reflects social identity, making it an invaluable addition to the library of anyone interested in cutting-edge linguistics.
