Proust's Songbook Jennifer Rushworth,2024-06-04 In Proust s Songbook Jennifer Rushworth analyzes and theorizes the presence and role of songs in Marcel Proust s novel *la recherche du temps perdu* In Search of Lost Time Instead of focusing on instrumental music and large scale forms such as symphonies and opera as is common in Proust musical studies Rushworth argues for the centrality of songs and lyrics in Proust s opus Her work analyzes the ways in which the author inserted songs at key turning points in his novel and how he drew inspiration from contemporary composers and theorists of song Rushworth presents detailed readings of five moments of song in *la recherche du temps perdu* highlighting the songs significance by paying close attention to their lyrics music composers and histories Rushworth interprets these episodes through theoretical reflections on song and voice drawing particularly from the works of Reynaldo Hahn and Roland Barthes She argues that songs in Proust s novel are connected and resonate with one another across the different volumes yet also shows how song for Proust is a solo amateur and intimate affair In addition she points to Proust s juxtapositions of songs with meditations on the notion of *mauvaise musique* bad music to demonstrate the existence of a blurred boundary between songs that are popular and songs that are art According to Rushworth a song for Proust has a special relation to repetition and memory due to its typical brevity and that song itself becomes a mode of resistance in *la Recherche* especially on the part of characters in the face of family and familial expectations She also defines the songs in Proust s novel as songs of farewell noting that to sing farewell is a means to resist the very parting that is being expressed and demonstrates how songs in formal terms resist the forward impetus of narrative **Sensory Evaluation of Sound** Nick Zacharov,2018-12-07 Sensory Evaluation of Sound provides a detailed review of the latest sensory evaluation techniques specifically applied to the

evaluation of sound and audio This three part book commences with an introduction to the fundamental role of sound and hearing which is followed by an overview of sensory evaluation methods and associated univariate and multivariate statistical analysis techniques The final part of the book provides several chapters with concrete real world applications of sensory evaluation ranging from telecommunications hearing aids design and binaural sound via the latest research in concert hall acoustics through to audio visual interaction Aimed at the engineer researcher university student or manager the book gives insight into the advanced methods for the sensory evaluation with many application examples Introduces the fundamental of hearing and the value of sound Provides a firm theoretical basis for advanced techniques in sensory evaluation of sound that are then illustrated with concrete examples from university research through to industrial product development Includes chapters on sensory evaluation practices and methods as well as univariate and multivariate statistical analysis Six application chapters covering a wide range of concrete sensory evaluation study examples including insight into audio visual assessment Includes data analysis with several associated downloadable datasets Provides extensive references to the existing research literature text books and standards
