Sound Shape Of Language:

The Sound Shape of Language Roman Jakobson, Linda R. Waugh, 2002 Reading this volume transported me back to Harvard and MIT lecture halls of the 1960s where weekly Roman Jakobson would spellbind his audience this reviewer included developing his vision of language through impassioned exposition deft and devastating allusions to critical literature anecdotes with the force of parables metaphors of mythic imagery and above all else overriding verbal artistry truly in his own phrase In the poetry of grammar The Sound Shape of Language his collaboration with Linda R Waugh a scholar who has devoted considerable attention to an exposition and elaboration of Jakobsonian views fortunately has preserved in print the authoritative lectorial voice Michael Silverstein in Journal of Communication *The Sound Shape of Language* Roman Jakobson, Linda R. Waugh, 2020-05-18 No detailed description available for The Sound Shape of Language *The Sound Shape of language. By Roman Jakobson & Linda (R.) Waugh. Assisted by Martha Taylor. Roman Jakobson, Linda R Waugh, 1979 **Sound-Emotion Interaction in Poetry** Reuven Tsur, Chen Gafni, 2022-06-03 This book is a collection of studies providing a unique view on two central aspects of poetry sounds and emotive qualities with emphasis on their interactions The book addresses various theoretical and methodological issues related to topics like sound symbolism poetic prosody and voice quality in recited poetry The authors examine how these sound related phenomena contribute to the generation of emotive qualities and how these qualities are perceived by readers and listeners The book builds upon Reuven Tsur s theoretical research and supplements it from an experimental angle It also engages in methodological debates with prevalent scientific approaches In particular it emphasises the importance of proper theory in empirical literary studies and the role of the personal traits of the reader in literary analysis The intended readership of this book consists mainly of literary scholars but it might also appeal to researchers from disciplines such as linguistics psychology and brain science

Ideophones F. K. Erhard Voeltz, Christa Kilian-Hatz, 2001-12-19 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St Augustin Germany They center around the following hypotheses Ideophones are universal and constitute a grammatical category in all languages of the world ideophones and similar words have a special dramaturgic function that differs from all other word classes they simulate an event an emotion a perception through language In addition to this unique function a good number of formal parallels can be observed The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer Another observation concerns the sound symbolic behavior of ideophones Thus the word formation of ideophones differs from other words in their tendency for iconicity and sound symbolism Finally it is made clear that ideophones are part of spoken language the language register where gestures are used rather than written language

offhand often overlooked comment Karl Marx deemed human corporeal organisation the first fact of human history Following Marx s corporeal turn and pursuing the radical implications of his corporeal insight this book undertakes a reconstruction of the corporeal foundations of historical materialism Part I exposes the corporeal roots of Marx s materialist conception of history and historical materialist Wissenschaft Part II attempts a historical materialist mapping of human corporeal organisation Suggesting how to approach human histories up from their corporeal foundations Part III elaborates historical materialism as corporeal semiotics Part IV a case study of Marx s critique of capitalist socio economic and cultural forms reveals the corporeal foundations of that critique and the corporeal depth of his vision of human freedom and dignity

comprehensive and very informative summary of contemporary work on lexical blending. It combines theoretically informed descriptions of a variety of languages and a number of contributions with a theoretically original focus. It is the first book of its kind on the subject and because of its cross disciplinary nature it is of high relevance not only to word formation scholars and students but also to a wide readership within the linguistics community.

Sinologism Ming Dong Gu, 2013. Why for centuries have the West and the world continuously produced China knowledge that deviates from Chinese realities? Why since the mid nineteenth century have Chinese intellectuals oscillated between commendation and condemnation of their own culture and between fetishization and demonization of all things Western? And why have some of the world's wisest thinkers expressed opinions on Chinese culture which are simply wrong? In order to answer these questions this book explores the process of knowledge production about China and the Chinese civilization and in turn provides a critique of the ways in which this knowledge is formed. Ming Dong Gu argues that the misperceptions and misinterpretations surrounding China and the Chinese civilisation do not simply come from misinformation, biases, prejudices or political interference but follow certain taken for granted principles that have evolved into a cultural unconscious. Indeed Gu argues that the conflicting accounts in China West studies are the inevitable outcome of this cultural unconscious which constitutes the inner logic of a comprehensive knowledge system which he terms Sinologism. This book explores Sinologism's origin, development, characteristics and inner logic and critiques its manifestations in the writings of Chinese, Western and non-Western thinkers and scholars including Montesquieu, Herder, Hegel, Marx, Weber, Russell, Pound, Wang Guowei, Guo Moruo, Gu Jiegang, Wen Yiduo and many others in diverse disciplines from arts and humanities to social sciences. In doing so Gu demonstrates why the existing critical models are inadequate for Chinese materials and makes an attempt to construct an alternative theory to Orientalism and postcolonialism for China West studies and cross cultural studies. Sinologism crosses over the subjects of history, thought, literature, language, art, archaeology, religion, aesthetics and cultural theory and will appeal to students and scholars of East West studies with a particular focus on China as well as those interested in cultural theory more broadly.

Aesthetic Animism David Jhave Johnston, 2016-06-03. A poetics appropriate to the digital era that connects digital poetry to traditional poetry's concerns with being. This book offers a decoder for some of the new forms of poetry enabled by digital technology. Examining many of the strange technological vectors converging on language it proposes a poetics appropriate to the digital era while connecting digital poetry to traditional poetry's concerns with being. A k a ontological implications. Digital poetry in this context is not simply a descendent of the book. Digital poems are not necessarily poems or written by poets; they are found in ads, conceptual art, interactive displays, performative projects, games or apps. Poetic tools include algorithms, browsers, social media and data. Code blossoms into poetic objects and poetic proto organisms. Introducing the terms TAVs (Textual Audio Visuals) and TAVITS (Textual Audio Visual Interactive), Aesthetic Animism theorizes a relation between scientific method and literary analysis, considers the temporal implications of animation software and links software
