*Ornamentation in Baroque and Post-Baroque Music, with Special Emphasis on J.S. Bach* Frederick

Neumann, 2020-05-05 Ornaments play an enormous role in the music of the seventeenth and eighteenth centuries and ambiguities in their notation as well as their frequent omission in the score have left doubt as to how composers intended them to be interpreted Frederick Neumann himself a violinist and conductor questions the validity of the rigid principles applied to their performance In this controversial work available for the first time in paperback he argues that strict constraints are inconsistent with the freedom enjoyed by musicians of the period The author takes an entirely new look at ornamentation and particularly that of J S Bach He draws on extensive research in England France Germany Italy and the United States to show that prevailing interpretations are based on inadequate evidence These restrictive interpretations have

been far reaching in their effect on style By questioning them this work continues to stimulate a reorientation in our understanding of Baroque and post Baroque music Harvard Dictionary of Music Willi Apel,1969 Contains nearly 1000 pages of precise and accessible information on all musical subjects The Musical Times & Singing-class Circular ,1911

Woolley,John Kitchen,2016-05-23 Research in the field of keyboard studies especially when intimately connected with issues of performance is often concerned with the immediate working environments and practices of musicians of the past An important pedagogical tool the keyboard has served as the workbench of countless musicians over the centuries In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges In recent decades interest has turned towards a contextualized understanding of creative processes in music and keyboard studies appears well placed to contribute to the exploration of this wider concern The nineteen essays collected here encompass the range of research in the field bringing together contributions from performers organologists and music historians Questions relevant to issues of creative practice in various historical contexts and of interpretative issues faced today form a guiding thread Its scope is wide ranging with contributions covering the mid sixteenth to early twentieth century It is also inclusive encompassing the diverse range of approaches to the field of contemporary keyboard studies Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period **Organ Literature** Corliss Richard Arnold,2003-02 Now in paperback Cloth edition 0 8108 2964 9 originally published in 1995

**Theology as Performance** Philip Stoltzfus,2006-06-05 Theology as Performance breaks new ground in the growing conversation between modern theology and philosophical aesthetics Stoltzfus proposes that significant moments in the Western development of the concept of God in particular as represented in the figures of Friedrich Schleiermacher Karl Barth and Ludwig Wittgenstein have been deeply influenced by concepts and approaches borrowed from the discipline of musical aesthetics Each thinker develops fundamentally different ways of writing about God that have in significant respects been derived from each one's reading and writing about music The aesthetic implications of Schleiermacher's so called subjectivist turn Barth's objectivist reaction and Wittgenstein's language game pragmatism can thus be fully understood only by attending to the musical culture and distinctly musicological

discourses that gave rise to them Stoltzfus constructs two trajectories of thought with which to trace theological reflection upon music throughout the pre modern period the traditions of Orpheus and Pythagoras Schleiermacher s aesthetic approach then becomes a modern representative of the Orpheus trajectory and Barth s approach a representative of the Pythagoras trajectory Stoltzfus interprets Wittgenstein as putting forward a radical critique of these trajectories and pointing toward a third performative theological aesthetic method Theology as Performance offers a provocative rethinking of the aesthetic roots of modern theology

*Theology, Music and Time* Jeremy S. Begbie, 2000-07-24 Theology Music and Time aims to show how music can enrich and advance theology extending our wisdom about God and God s ways with the world Instead of asking what can theology do for music it asks what can music do for theology Jeremy Begbie argues that music s engagement with time gives the theologian invaluable resources for understanding how it is that God enables us to live peaceably with time as a dimension of the created world Without assuming any specialist knowledge of music he explores a wide range of musical phenomena rhythm metre resolution repetition improvisation and through them opens up some of the central themes of the Christian faith creation salvation eschatology time and eternity Eucharist election and ecclesiology He shows that music can not only refresh theology with new models but also release it from damaging habits of thought which have hampered its work in the past

**Interpreting Historical Keyboard Music** Dr Andrew Woolley, Dr John Kitchen, 2013-12-28 Research in the field of keyboard studies especially when intimately connected with issues of performance is often concerned with the immediate working environments and practices of musicians of the past An important pedagogical tool the keyboard has served as the workbench of countless musicians over the centuries In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges In recent decades interest has turned towards a contextualized understanding of creative processes in music and keyboard studies appears well placed to contribute to the exploration of this wider concern The nineteen essays collected here encompass the range of research in the field bringing together contributions from performers organologists and music historians Questions relevant to issues of creative practice in various historical contexts and of interpretative issues faced today form a guiding thread Its scope is wide ranging with contributions covering the mid sixteenth to early twentieth century It is also inclusive encompassing the diverse range of approaches to the field of contemporary keyboard studies Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period
