## **The Logic Basis Of Metaphysics First Edition 1991:**

*Metaphor, Metonymy, and Experientialist Philosophy* Verena Haser, 2011-12-22 The present book provides a detailed criticism of experientialist semantics focusing both on philosophical issues connected with experientialism and on cognitive approaches to metaphor and metonymy Particular emphasis is placed on the works of George Lakoff and Mark Johnson but other cognitivists are also taken into consideration Verena Haser proposes a new approach to the distinction between metaphor and metonymy which contrasts with familiar cognitivist models but also builds on some insights gained in cognitivist research She also offers an account of metaphorical transfer which dispenses with the notion of conceptual metaphors in the sense of Lakoff and Johnson She argues that conceptual metaphors are not a useful construct for explaining metaphorical transfer and that the clustering of metaphorical expressions is better accounted for in terms of family resemblances between metaphorical expressions Another major goal of this work is a reassessment of the relationship between experientialism and traditional Western philosophy often subsumed under the vague term objectivism This book contrasts with most other critical approaches to experientialism by providing close readings of key passages from the works of Lakoff and Johnson which enables the author to pinpoint theory internal inconsistencies and other shortcomings not noted in previous publications This book will be relevant to students and scholars interested in semantics and cognitive linguistics and also in psychology and philosophy of language

*Meaning and Justification. An Internalist Theory of Meaning* Gabriele Usberti, 2023-07-28 This volume develops a theory of meaning and a semantics for both mathematical and empirical sentences inspired to Chomsky's internalism namely to a view of semantics as the study of the relations of language not with external reality but with internal or mental reality In the first part a theoretical notion of justification for a sentence A is defined by induction on the complexity of A intuitively justifications are conceived as cognitive states of a particular kind The main source of inspiration for this part is Heyting's explanation of the intuitionistic meaning of logical constants In the second part the theory is applied to the solution of several foundational problems in the theory of meaning and epistemology such as Frege's puzzle Mates puzzle about synonymy the paradox of analysis Kripke's puzzle about belief the de re de dicto distinction the specific non specific distinction Gettier's problems the paradox of knowability and the characterization of truth On a more general philosophical level throughout the book the author develops a tight critique of the neo verificationism of Dummett Prawitz and Martin L f and defends a mentalist interpretation of intuitionism

Holism in Philosophy of Mind and Philosophy of Physics M. Esfeld, 2013-03-09 The Scope of the Project The concept of holism is at the centre of far reaching changes in various areas of philosophy in the second half of the twentieth century Holism in epistemology and the philosophy of mind is widespread among analytic philosophers subsequent to the work of the later Wittgenstein and to Quine's Two Dogmas of Empiricism Roughly speaking the claim is that a for a person to have beliefs a social linguistic community is required and that b single beliefs have a meaning only within a whole system of beliefs

Furthermore holism is discussed in science in particular in the interpretation of quantum physics In fact the term holism goes back to Smuts 1926 who introduces this term in a biological context Holism in any of these areas has considerable consequences for our philosophical view of the world and ourselves Holism in quantum physics is said to refute atomism which has been predominant in modern philosophy of nature Holism in epistemology and the philosophy of mind is seen as an alternative to what is known as the Cartesian tradition which dominated modern thought down to logical empiricism

Logic, Language, and Mathematics Alexander Miller, 2020 Crispin Wright is widely recognised as one of the most influential analytic philosophers of his generation This volume collects essays which explore the major themes of his work in philosophy of language philosophy of mathematics metaphysics and epistemology along with four substantial responses from Wright

**Interpreting Quantum Mechanics** Lars-Göran Johansson, 2016-12-05 Presenting a realistic interpretation of quantum mechanics and in particular a realistic view of quantum waves this book defends with one exception Schrodinger's views on quantum mechanics Johansson goes on to defend the view that the collapse of a wave function during a measurement is a real physical collapse of a wave and argues that the collapse is a consequence of quantisation of interaction Lastly Johansson argues for a revised principle of individuation in the quantum domain and that this principle enables a sort of explanation of non local phenomena

Historical Ontology Ian Hacking, 2004-09-15 Hacking here offers his reflections on the philosophical uses of history The focus of this volume which collects both recent and now classic essays is the historical emergence of concepts and objects through new uses of words and sentences in specific settings and new patterns or styles of reasoning within those sentences

*Donald Davidson on Truth, Meaning, and the Mental* Gerhard Preyer, 2012-09-06 This volume offers a reappraisal of Donald Davidson's influential philosophy of thought meaning and language Twelve specially written essays by leading philosophers in the field illuminate a range of themes and problems relating to these subjects and engage in particular with Ernie Lepore and Kirk Ludwig's interpretation of Davidson's thought

**The Logical Foundations of Bradley's Metaphysics** James Allard, 2004-11-22 This book is a major contribution to the study of the philosopher F H Bradley the most influential member of the nineteenth century school of British Idealists It offers a sustained interpretation of Bradley's Principles of Logic explaining the problem of how it is possible for inferences to be both valid and yet have conclusions that contain new information The author then describes how this solution provides a basis for Bradley's metaphysical view that reality is one interconnected experience and how this gives rise to a new problem of truth

Key Thinkers in Linguistics and the Philosophy of Language Siobhan Chapman, Christopher Routledge, 2005 This book is a unique and accessible reference guide to the work of eighty key figures who have played an important role in the development of ideas about language from antiquity to the twenty first century The entries are extensively cross referenced allowing readers to trace influences developments and debates both in contemporary thinking and across time Each entry concludes with suggestions for further reading of primary texts and secondary sources encouraging readers to find out more

about the particular key thinker and the impact of his or her ideas      Mathematical Intuitionism Carl J. Posy, 2020-11-12 L E  
J Brouwer the founder of mathematical intuitionism believed that mathematics and its objects must be humanly graspable He initiated a program rebuilding modern mathematics according to that principle This book introduces the reader to the mathematical core of intuitionism from elementary number theory through to Brouwer s uniform continuity theorem and to the two central topics of formalized intuitionism formal intuitionistic logic and formal systems for intuitionistic analysis Building on that the book proposes a systematic philosophical foundation for intuitionism that weaves together doctrines about human grasp mathematical objects and mathematical truth
