## **The Logic Of Practice:**

**The Logic of Practice** Pierre Bourdieu, 1990 Our usual representations of the opposition between the civilized and the primitive derive from willfully ignoring the relationship of distance our social science sets up between the observer and the observed In fact the author argues the relationship between the anthropologist and his object of study is a particular instance of the relationship between knowing and doing interpreting and using symbolic mastery and practical mastery or between logical logic armed with all the accumulated instruments of objectification and the universally pre logical logic of practice In this his fullest statement of a theory of practice Bourdieu both sets out what might be involved in incorporating one's own standpoint into an investigation and develops his understanding of the powers inherent in the second member of many oppositional pairs that is he explicates how the practical concerns of daily life condition the transmission and functioning of social or cultural forms The first part of the book *Critique of Theoretical Reason* covers more general questions such as the objectivization of the generic relationship between social scientific observers and their objects of study the need to overcome the gulf between subjectivism and objectivism the interplay between structure and practice a phenomenon Bourdieu describes via his concept of the habitus the place of the body the manipulation of time varieties of symbolic capital and modes of domination The second part of the book *Practical Logics* develops detailed case studies based on Bourdieu's ethnographic fieldwork in Algeria These examples touch on kinship patterns the social construction of domestic space social categories of perception and classification and ritualized actions and exchanges This book develops in full detail the theoretical positions sketched in Bourdieu's *Outline of a Theory of Practice* It will be especially useful to readers seeking to grasp the subtle concepts central to Bourdieu's theory to theorists interested in his points of departure from structuralism especially from Levi Strauss and to critics eager to understand what role his theory gives to human agency It also reveals Bourdieu to be an anthropological theorist of considerable originality and power

Schrift, Patrick Murray, 1997 The *Logic Of The Gift* is an interdisciplinary collection that brings together some of the classic essays on gifts and gift giving alongside work especially written for this volume *The Logic of Racial Practice* Brock Bahler, 2021-02-08 The title of this collection *The Logic of Racial Practice* pays homage to the work of Pierre Bourdieu who coined the term habitus to name the pretheoretical embodied dispositions that orient our social interactions and meaningfully frame our lived experience The language of habit uniquely accounts for not only how we are unreflectively conditioned by our social environments but also how we responsibly choose to enact our habits and can change them Hence this collection of essays edited by Brock Bahler explores how white supremacy produces a racialized modality by which we live as embodied beings arguing that race and racism is performative habituated and enacted We do not regularly have to think about race since race is a praxis producing embodied habits that have become

sedimented into our ways of being in the world and that instill within us racialized and racist dispositions postures and bodily comportments that inform how we interact with others The construction of race produces a particular bodily formation in which we are shaped to viscerally perceive through a racialized lens images words activities and events without any self reflective conceptualization and which we perpetuate throughout our day to day choices The contributors argue that eradicating racism in our society requires unlearning these racialized habitus and cultivating new anti racist habits
