The Logic Of The Cultural Sciences Five Studies Cassirer Lectures Series:

Intensities and Lines of Flight Antonio Calcano, Jim Vernon, Steve G. Lofts, 2014-05-08 The writings of Gilles Deleuze and Felix Guattari offer the most enduring and controversial contributions to the theory and practice of art in post war Continental thought However these writings are both so wide ranging and so challenging that much of the synoptic work on Deleuze Guattarian aesthetics has taken the form of sympathetic exegesis rather than critical appraisal This rich and original collection of essays authored by both major Deleuzian scholars and practicing artists and curators offers an important critique of Deleuze and Guattari's legacy in relation to a multitude of art forms including painting cinema television music architecture literature drawing and installation art Inspired by the implications of Deleuze and Guattari's work on difference and multiplicity and with a focus on the intersection of theory and practice the book represents a major interdisciplinary contribution to Deleuze Guattarian aesthetics

The Logic of the Cultural Sciences Ernst Cassirer, 2000 This new translation of The Logic of the Cultural Sciences formerly entitled The Logic of the Humanities makes Ernst Cassirer's classic study long out of print available to English readers A German Jew living in exile at the beginning of the Second World War Cassirer wrote this book one of his clearest and most concise in response to the crises besetting his era It represented to him a rethinking and completion of his magnum opus The Philosophy of Symbolic Forms S G Lofts's translation stays close to the original German and accurately reflects the echoes of the philosophical debates of Cassirer's day In the book's five linked studies Cassirer considers the intellectual structure of the disciplines we commonly refer to as the humanities He defines and justifies the basic philosophical perspective of the philosophy of symbolic forms and he contributes a wealth of ideas to continuing debates about culture and what is unique in human nature

Cassirer Samantha Matherne, 2021-04-25 Ernst Cassirer 1874 1945 occupies a unique place in 20th century philosophy His view that human beings are not rational but symbolic animals and his famous dispute with Martin Heidegger at Davos in 1929 are compelling alternatives to the deadlock between analytic and continental approaches to philosophy An astonishing polymath Cassirer's work pays equal attention to mathematics and natural science but also art language myth religion technology and history However until now the importance of his work has largely been overlooked In this outstanding introduction Samantha Matherne examines and assesses the full span of Cassirer's work Beginning with an overview of his life and works she covers the following important topics Cassirer's neo Kantian background Philosophy of mathematics and natural science including Cassirer's first systematic work Substance and Function and subsequent works like Einstein's Theory of Relativity The problem of culture and the ground breaking The Philosophy of Symbolic Forms Cassirer's ethical and political thought and his diagnosis of fascism in The Myth of the State Cassirer's influence and legacy Including chapter summaries suggestions for further reading and a glossary of terms this is an ideal introduction to Cassirer's thought for anyone coming to his work for the first time It is essential reading for students in philosophy as well as related disciplines such as intellectual history art history politics and

literature **Ernst Cassirer on Form and Technology** A. Hoel, I. Folkvord, 2012-08-21 Ernst Cassirer's thought provoking essay *Form and Technology* 1930 ascribes to technology a new dignity as a genuine tool of the mind in equal company with language and art Translated here into English it is accompanied by critical essays that explore its current relevance The Journal of Philosophy , 2001 **The Philosophy of Ernst Cassirer** J Tyler Friedman, Sebastian Luft, 2015-06-16 This volume brings Cassirer's work into the arena of contemporary debates both within and outside of philosophy All articles offer a fresh and contemporary look at one of the most prolific and important philosophers of the 20th century The papers are authored by a wide array of scholars working in different areas such as epistemology philosophy of culture sociology psychopathology philosophy of science and aesthetics **Cultus Americanus** Brent Gilchrist, 2006-01-01 *Cultus Americanus* applies a philosophical model of political culture as ideology religion and myth to a reconsideration of America's liberal consensus to explain cultural diversity in America Author Brent Gilchrist engagingly depicts a political culture that is more complex and more cohesive than has been previously maintained that will be of great interest to scholars and students of American politics and history **Kyoto in Davos. Intercultural Readings of the Cassirer-Heidegger Debate** , 2023-12-28 What does it mean to be human We invite the reader to discuss this most fundamental issue in philosophy and to do so in an intercultural framework The question of the human was the starting point for a legendary discussion between two German philosophers who met in Davos in 1929 We return to this historical event and re-imagine the debate between Martin Heidegger and Ernst Cassirer from a global perspective Generating twenty papers from elaborate discussions our authors contribute to the thought experiment by inviting the Japanese philosopher Nishida Kitaro from Kyoto and other Japanese thinkers into the debate to overcome the challenge of Eurocentrism inherent to these historic days in Davos Chaos and Cosmos Karen Ann Lang, 2006 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable scholarly discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky's approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer's contemporaneous publications on the substance and function of scientific concepts and on Einstein's theory of relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant's uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe's inspiration for both Alois Riegl's notion of age value and Walter Benjamin's conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this

venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge Ernst Cassirer Edward Skidelsky,2011-10-24 This is the first English language intellectual biography of the German Jewish philosopher Ernst Cassirer 1874 1945 a leading figure on the Weimar intellectual scene and one of the last and finest representatives of the liberal idealist tradition Edward Skidelsky traces the development of Cassirer s thought in its historical and intellectual setting He presents Cassirer the author of The Philosophy of Symbolic Forms as a defender of the liberal ideal of culture in an increasingly fragmented world and as someone who grappled with the opposing forces of scientific positivism and romantic vitalism Cassirer s work can be seen Skidelsky argues as offering a potential resolution to the ongoing conflict between the two cultures of science and the humanities and between the analytic and continental traditions in philosophy The first comprehensive study of Cassirer in English in two decades this book will be of great interest to analytic and continental philosophers intellectual historians political and cultural theorists and historians of twentieth century Germany
