Computing Anticipatory Systems D. Dubois, 2008-12-02 These proceedings deal with a selection of papers presented at the 8th International Conference CASYS 07 on COMPUTING ANTICIPATORY SYSTEMS 6-11 August 2007 held at HEC Management School University of Liege Liège Belgium The content of these proceedings deals with the most recent Research Development in the area of theoretical developments and applications in the modelling and computing of anticipation in any fields of natural and artificial systems A computing anticipatory system is a system that computes its current states in taking into account its past and present states

but also its potential future states Strong anticipation refers to an anticipation of events built by or embedded in a system Weak anticipation refers to an anticipation of events predicted or forecasted from a model of a system This volume contains the first invited lecture Neural Approach to Machine Consciousness by Prof Dr Igor Aleksander FREng UK who received the CHAOS AWARD and the second invited lecture Quantum Mechanics Pattern Recognition and the Mammalian Brain by Dr George Chapline USA who received the CASYS AWARD The peer reviewed papers that received a BEST PAPER AWARD at CASYS 07 and some invited papers are included in these proceedings Adel F Antippa Canada and Daniel M Dubois Belgium presented the continuation of their original research project on discrete physics with their third fundamental paper Synchronous Discrete Harmonic Oscillator that also appears in these proceedings The interdisciplinary outstanding topics of these proceedings are readable by researchers and scientists with a university background **Balls of Fire** Judy Kay King, 2015-02-20 Spanning 5 000 years of history from ancient Egypt to our technoprogressive 21st century the science reviewed in Balls of Fire builds on The Isis Thesis 2004 and 12 journal articles 2005 2013 The Isis Thesis is a semiotic study of ancient Egyptian literature artwork ritual and architecture showing that ancient Egyptian deities are signs for human and microbial genes and proteins evolving into a hybrid quantum species The deities activities describe the ancient glycolysis gene expression network in our cells and mirror the lifestyles of a complex bacterial virus that uses this ancient developmental pathway Surprisingly other historical religious deities mirror the activities of Egyptian deities so religion has also preserved an evolutionary science for survival of human DNA in a quantum environment Balls of Fire presents evidence that our semiotic system is based on underlying physical and chemical principles inherited from our microbial ancestors so our microbial DNA is ordering our society space Examining human history through the dual lens of contemporary science and human behavior the study shows that human beings have the potential to evolve at death into a unique hybrid species Elite historical rulers have consistently veiled this evolutionary knowledge from humanity However our behavior has stamped an evolutionary viral footprint on the last 12 000 years of human history In line with the methodology of Imre Lakatos 1970 on progressive and degenerating research programs Balls of Fire examines the core hypotheses of the Isis Thesis its predictions and several other auxiliary hypotheses Understanding transdisciplinary ancient Egyptian knowledge is not easy so Balls of Fire uses the same mental model and ritual that the pharaonic priesthood imagined to describe the ancient viral gene expression network in our cells for morphogenesis That model is their ball throwing rite or the game of baseball which originated in ancient Egypt to illustrate a viral protein binding battle over gene bases Although the game of baseball has drifted through the centuries as a popular sport in many cultures it originally expressed microbiological warfare at the level of viral genes and proteins Because ancient Egyptian science mirrors the knowledge of our contemporary sciences the baseball model simplifies the information for readers while explaining the science that the pharaonic priesthood concealed in pyramids and tombs for centuries For the creation of the baseball model a fantasy draft selection of two teams frames the

historical power knowledge grid as well as the scientific argument for and against the Isis Thesis while explaining the necessary context for what the theory predicts and scientific experiments confirm This is accomplished by the draft of dead and living scientists philosophers writers and other creative artists whose ideas are presented in two fantasy teams in order to tackle the mind body problem that has confounded humans for centuries Using this adversarial system the reader determines the truth of the case through a transdisciplinary quest that prioritizes scientific research Also summarizing the author's 12 published scientific papers Balls of Fire presents findings correlative with the history of human ideas along with scientific evidence and mechanistic insights to establish the clear link between nature our behavior and human evolutionary potential The evidence shows that our behavior and the evolution of society in the last 12 000 years has carved a footprint into human history profiling a viral developmental pathway for human evolution Balls of Fire exposes this hidden survival agenda in baseball ancient cultures alchemy literary texts Christianity world visions our sciences and history itself
