*Music's Golden Frontier* Smitty Herron, 2011-08-02 Smitty is a creative talent who brings a very unique interpretation that is both informative and anecdotal He had spent most of his life studying and working with the graphic visual arts Although he still loves the visual arts he finally realized later in life what he had actually known all along that everything comes back to a song It is not unusual for anyone to conjure up vivid memories whenever a certain song is mentioned or played However Smitty does it in a way that puts the reader into the actual environment very magical Most folks would probably not have experienced some of the events and circumstances that he mentions within this book but I think that everyone can relate to

them Another factor that sets this book apart from other music retrospectives are the constant reminders of those unheralded performers writers producers who seldom would get top billing but who made outstanding creations just the same One of his strongest talents is being able to link a specific historic event with a song which of course comes from a very deep memory This along with the sometimes humorous observations contained throughout make for very enjoyable and informative reading Could actually be considered as a general reference book for the music and events of the baby boomer generation The best thing is not only is this book a story about a specific era but it is his story

**Environment, Social Justice, and the Media in the Age of the Anthropocene** Elizabeth G. Dobbins, Luigi Manca, Maria Lucia Piga, 2020-02-17 Environment Social Justice and the Media in the Age of Anthropocene addresses three imminent challenges to human society in the age of the Anthropocene The first challenge involves the survival of the species the second the breakdown of social justice and the third the inability of the media to provide global audiences with an adequate orientation about these issues The notion of the Anthropocene as a geological age shaped by human intervention implies a new understanding of the human context that influences the physical and biological sciences Human existence continues to be affected by the physical and biological reality from which it evolved but in turn it affects that reality as well This work addresses this paradox by bringing together the contributions of researchers from very different disciplines in conversation about the complex relationships between the physical biological world and the human world to offer different perspectives and solutions in establishing social and environmental justice in the age of the Anthropocene
